What is BlueSpiceInterwikiSearch?

BlueSpiceInterwikiSearch allows simultaneously searching other BlueSpice3 wikis when performing a search on the wiki.

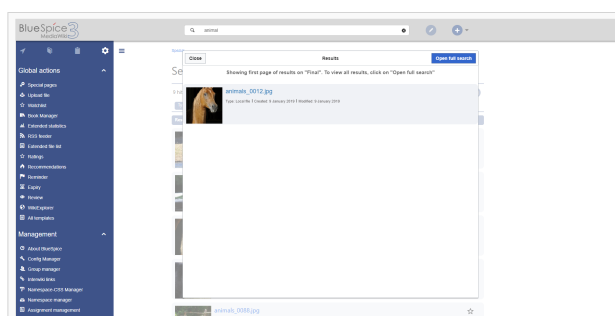

Usage

If BlueSpiceInterwikiSearch is enabled and configured on the wiki, every time user performs a search using the `Special:SearchCenter`, results from other wikis will be shown as well. Results from other wikis will be shown at the top of the page, below the filters, in form of Wiki name (number of results) buttons.

Viewing results from other wikis

Clicking on a particular wiki's button will open a dialog containing the first page of the results, in order to enable quick and easy way of visualizing the results. If the desired document is not listed on this page, user can redirect to the target wiki and perform a full search on that wiki, by clicking on "Open full search" button at the top right corner of the dialog. This will open the `Special:SearchCenter` on the target wiki, with current search term already inserted.

Results from other wiki in a dialog

Configuring BlueSpiceInterwikiSearch

In order to set up this service, wiki administrator must add following settings into `LocalSettings.php`:

```
$GLOBALS['bsgBlueSpiceInterwikiSearch']['Wiki_name'] = [  
    "name" => "Wiki name", // Will be displayed as the wiki name in the results  
    "api-endpoint" => "http://other.wiki.com/api.com",  
    "search-on-wiki-url" => "http://other.wiki.com/Special:SearchCenter" // URL to the Search  
];
```

Note: This does not apply to **BlueSpiceWikiFarm** users, **BlueSpiceInterwikiSearch** within a **WikiFarm** is handled separately.
