

PHP Warnings (XAMPP)

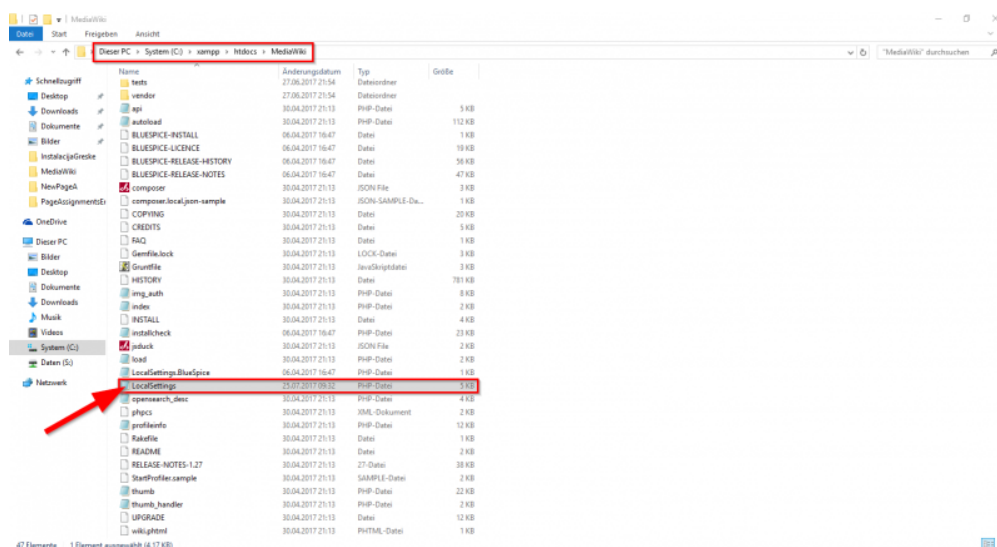

During the installation or some PHP warnings can be displayed. To solve this problem just follow these steps.

Example of warning messages

How to hide warnings

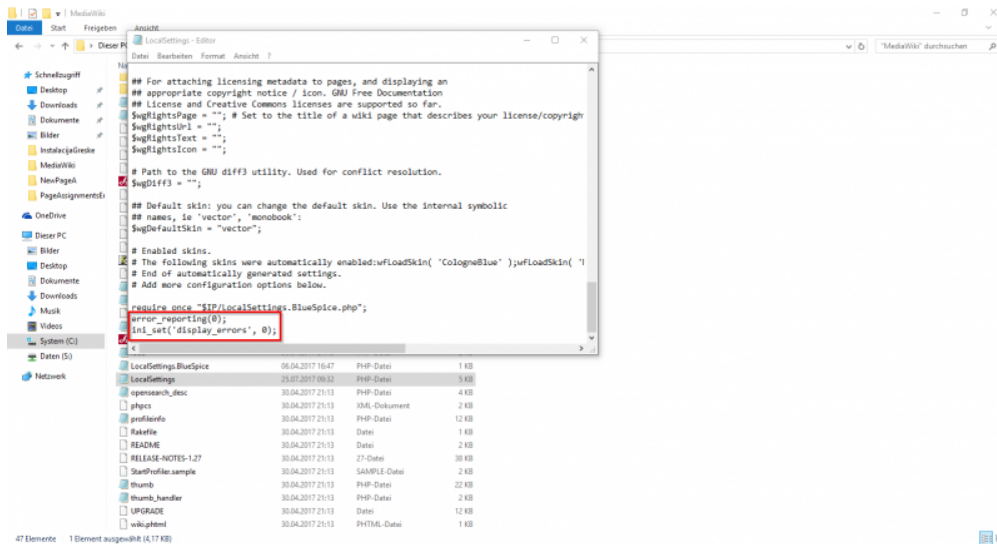

Open **your computer**, on **System C**, go to the folder **xampp**. In this folder **xampp** you will find a folder **htdocs** with your BlueSpice installation folder. In that folder you will find **LocalSettings** as image below shows:

Open **LocalSettings** and scroll down, on the end type:

error_reporting(0);
ini_set('display_errors', 0);

Like on this image:

Save: **Ctrl + S**

The PHP warnings will be hidden now.
