Description

Bookshelf is an extension of the package [BlueSpice Bookmaker](#). Bookshelf enables you to combine different wiki articles to create books and also to export those as a pdf document.

Usage/ Features

- Sets of different chapters / articles / documents can be put together individually to a book.
- The table of contents of the book is displayed in the upper right of the standard.
- The chapters are displayed in a collapsible tree structure.
- Click on a chapter heading to navigate to it.
- There is a "Next" and "Back" button to navigate between the chapters of the book.

Technical information

Configuration

Some aspects of this extension can be configured on [Special:BlueSpicePreferences](#), under section "Bookshelf". Here wiki administrators can configure following:

- Prepend article table of contents and headlines with book numberation.
- Supress namespace prefix of book articles in output.
- Use display title from book source on article.

Rights (permissions)

The right to create a book depends on "edit" permission in the "Book" namespace.

Requirements

This extension requires [BlueSpiceFoundation](#).

User manual
