Description

Expiry marks after a certain period of time a chosen article as "obsolete". The article can be updated by editing or by confirming that the article is still up-to-date.

Expiry is the ideal basis for an archiving system. Outdated articles can be moved to an archive after being queried.

Usage / Features

- An author can add an expiration date to an article.
- The expiry date can automatically be postponed to the future for a specific period of time.
- Several authors: There can only be one expiration date. The user who originally entered the expiration date will be informed of the change.

- There is no limit to the number of expiration dates with respect to users.

Technical information

Configuration

This extension offers no configurations.

Rights (permissions)

This extension does not require any special rights.

Requirements

Expiry requires [BlueSpiceFoundation](#).
