## Description

**Expiry** marks after a certain period of time a chosen article as "obsolete". The article can be updated by editing or by confirming that the article is still up-to-date.

Expiry is the ideal basis for an archiving system. Outdated articles can be moved to an archive after being queried.

## Usage / Features

- An author can add an expiration date to an article.
- The expiry date can automatically be postponed to the future for a specific period of time.
- Several authors: There can only be one expiration date. The user who originally entered the expiration date will be informed of the change.

- There is no limit to the number of expiration dates with respect to users.

## Technical information

---

### Configuration

---

This extension offers no configurations.

### Rights (permissions)

---

This extension does not require any special rights.

### Requirements

---

Expiry requires [BlueSpiceFoundation](#).
