

1.8 SearchOptions

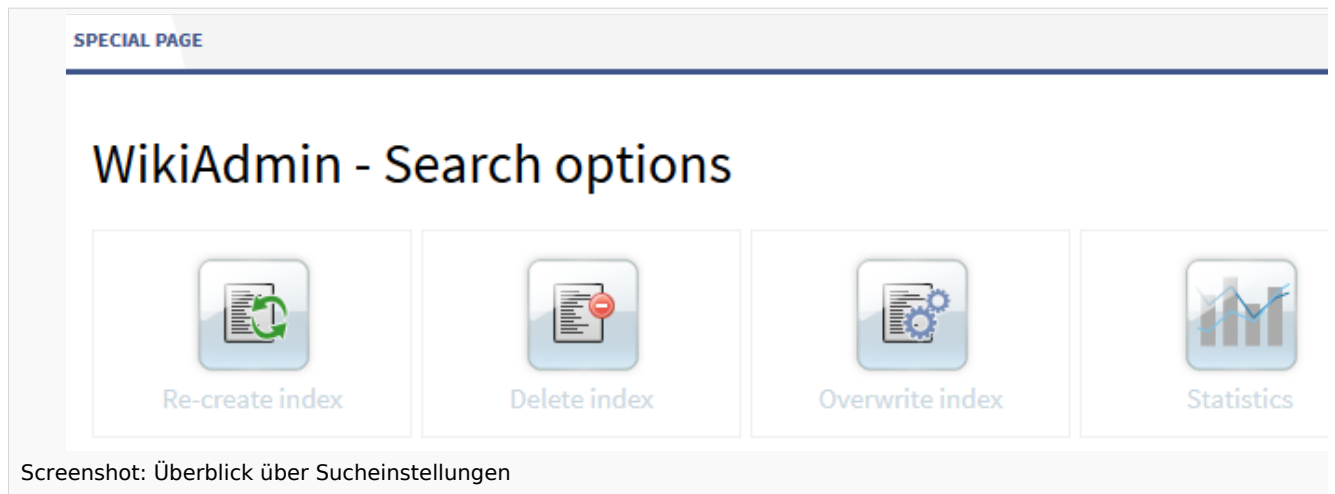

Search options is a special page for wiki admins to administrate the wiki search.

How to administrate the search?

To find the search options have a look at the admin navigation. There you will find a link to the special page.

Administrators can do the following actions:

- **Re-create index:** a click on this button will start the indexing
- **Delete index:** a click on this button will delete the index
- **Overwrite index:** a click on this button will start overwriting the index
- **Statistic:** if you click on this button you can start a request

If you click on statistics you will be redirected to `Special:ExtendedStatistics`.
Choose "search queries" as data base and limit the date range.
