Description

WikiAdmin is a container (tab in the left navigation), where an administrator can find special admin functions.

Usage / Features

Admin modules are registered with the WikiAdmin :: registerModuleClass or WikiAdmin :: registerModule extensions as a WikiAdmin module. The following admin modules are accessible via WikiAdmin:

- [UserPreferences](#) (user management).
- Settings.
- [ExtensionInfo](#) (extensions).
- [GroupManager](#) (Group Management).
- Interwikilinks.
- [NamespaceManager](#) (namespace management).
- [PermissionManager](#) (rights management).
- [PageTemplates](#).
- [ExtendedSearch](#) (configure search).
- [Preferences](#).
- Dashboard (Admin Cockpit).

Technical information

Configuration

Alternative to special page [Special:WikiAdmin](#). The WikiAdmin page contains lots of useful management options, which can be done in a very uncomfortable way or only in the script with [MediaWiki](#).

Rights (permissions)

All wiki admin preferences are only for users with administration permissions.

There are three steps:

- Wikiadmin: is allowed to do everything.
- Editadmin: is allowed to do everything concerning editing: page templates, search, interwiki, namespaces.
- Useradmin: is allowed to do everything concerning users: user manager, group manager, permission manager.

Requirements

WikiAdmin requires [BlueSpiceFoundation](#).

User manual

For detailed description and usage please visit our [user manual](#).
