### Demo

---
It offers analysis of many aspects of wiki, like:

- Number of users.
- Number of pages.
- Edits per user.
- Search queries and more.

This data can be filtered:

- By defining the period (from and to date).
- Granulation (interval to show on diagram - day, week, month, year).
- Type (absolute, aggregate and list modes).
- Additional filters depending of the data being represented.

Technical information

Configuration

Some aspects of this extension can be configured with the Config manager, under ExtendedStatistics. Here, wiki administrators can configure:

- the users to exclude from statistical analysis
- the maximum number of interval steps

Rights (permissions)

This extension does not require any special rights.

Requirements

ExtendedStatistics requires BlueSpiceFoundation.

### Where to find Extended statistics

The navigation link *Extended statistics* in the tab Global actions loads the page *Special:ExtendedStatistics*.

### Choosing a data source

ExtendedStatistics can show data for multiple aspects of the wiki. Available data sources are:

- **Number of users**: All the users that registered in the period chosen
- **Number of pages**: All pages created in the period chosen.
- **Number of content pages**: All articles in content namespaces created in the period chosen
- **Number of edits**: All edits carried out in the period chosen
- **Edits per user**: Number of edits per user in the period chosen
- **Search queries**: All terms users searched for in the period chosen. Only available if BlueSpiceExtendedSearch is installed.

### Choosing filters

**General filters:**

- From - Date from which to display data
- To - Date to which to display data

Some data sources may have additional filters available, like for data sources based on wiki pages, namespace filter is available.

![Filter selection](image)

### Display settings

The display of the results is determined by the following settings:

- **Interval** - grain of the diagram - determines which time unit will be used to group the data.
- **Mode** - display type:
  - Absolute - shows changes in data for the given period
  - Aggregate - shows running total for the data source chosen
  - List - shows data in tabular view - only available for certain data sources

**Note:** Depending on the selected time period, the interval has to be set accordingly. For example if you look for data between 02.06. and 03.06. for the same year, the interval setting "Year" will not return any data. Change the interval to "Week" or "Day" to return results.
Viewing the results

Once all the filters and options are set, click on the Results tab to show the resulting data.

Configuration

In the Config manager, you can change the following settings:

- **Exclude these users**: Some user groups, like WikiSysop can skew the statistics, for example the statistics for search queries or because they complete automated maintenance tasks. These types of user groups can be excluded from the statistical results.

- **Maximum number of interval steps**: Sets the size of the x-axis for the results. For a few days, select the interval **Day** or **Calendar Week**, for periods over one year, select **Year** or **Month**. If you do not get any results for your query, try to adjust the interval accordingly.

Related info

- Reference:BlueSpiceExtendedStatistics
Reference:BlueSpiceFoundation

The extension **BlueSpiceFoundation** is the interface between BlueSpice and Mediawiki. It provides basic functions for the individual BlueSpice extensions.

If you install any BlueSpice extension in a MediaWiki environment - that is outside of BlueSpice free or BlueSpice pro - the reference information for the extension will indicate if it requires BlueSpiceFoundation.

Technical information

Requirements

This extension requires **ExtJSSBase**.
