**Usage**

Quick access and less searching for special pages: The extension offers a search field at the special page “Specialpages”. While typing a search string (e.g. “pages”) only special pages with this search string in the title will be shown.
Special keys:

- Enter: open page link if only one entry left.
- Esc: Select input term.

Technical information

Configuration

This extension offers no configurations.

Rights (permissions)

This extension does not require any special rights.

Requirements

This is an extension for MediaWiki. BlueSpice is not required.

Usage

The functionality provided by this extension can be found on `Special:SpecialPages`.

It adds a search box at the top of the page. Typing in this field provides search-as-you-type functionality, and will refine the list of special pages to match the search term.

Clicking `Enter` when there is only one page in the search results opens the target page.

Clicking the `Esc` button highlights the text in the search field so it can be replaced easily.

FilterSpecialPages is an extension for MediaWiki. BlueSpice is not required. FilterSpecialPages can be used with the Vector skin, too.
