BlueSpiceHideTitle

HideTitle enables hiding of the title on the page, if it's necessary.

Usage / features

To hide a page's title, use __HIDETITLE__ anywhere in its source code.
Changing an existing article's title completely is not possible that way, but you can move the article to have the correct title.

Technical information

Configuration

This extension offers no configurations.

Rights (permissions)

This extension does not require any special rights. Users must have "edit" permission to insert the tag.

Requirements

HideTitle requires BlueSpiceFoundation.

More info

For detailed description and usage, visit our help page.

Demo

You can test this feature in our BlueSpice Demo.

Hide the title section

In some cases, it makes sense to hide the title of a page. For example, if you want to create a portal page. The extension HideTitle provides this feature for the wiki.

</table>
Usage

In VisualEditor, go to Page options > Advanced settings.

Set the title visibility to *Hide* and Save the setting. This adds the magic word `__HIDETITLE__` in the source code, usually at the top of the page. After saving the page, the page title is hidden in view mode.
BlueSpice pro is your enterprise wiki for building a modern knowledge base: Open source, customizable and globally proven. Test our software for 30 days. We look forward to your feedback and questions.

Related info

- Reference:BlueSpiceHideTitle
The extension **BlueSpiceFoundation** is the interface between BlueSpice and Mediawiki. It provides basic functions for the individual BlueSpice extensions.

If you install any BlueSpice extension in a MediaWiki environment - that is outside of BlueSpice free or BlueSpice pro - the reference information for the extension will indicate if it requires BlueSpiceFoundation.

### Technical information

#### Requirements

This extension requires **ExtJSBase**.
