---

**Usage / features**

- Assign responsible users to a page.
- Assign individual users or groups.
The responsible editor(s) for the page can be viewed in the flyout "Page assignments" in the quality management tools.

Users can view their assignments on the page Special:PageAssignments.

Users with admin, maintenanceadmin or reviewer rights can manage all assignments on the page Special:ManagePageAssignments.

Technical information

Configuration

The page assignments can be displayed in the title section of the page. Activate this page assignments display in LocalSettings.php (or in the php file in the d.settings folder):

```
$GLOBALS['bsgBlueSpiceCalummaPageHeaderBeforeContentEnabledProviders'] = [ "pageheader-assignments" ];
```

Set the limit:

```
$GLOBALS['bsgPageAssignmentsPageHeaderLimit'] = 25;
```

Rights (permissions)

Pages can only be assigned to users with the pageassignable permission (by default, this right is assigned to the reader, editor and author roles). Only users with pageassignments permission can assign pages to others (by default, this right is assigned to the reviewer, admin and maintenanceadmin roles).

Requirements

PageAssignments requires BlueSpiceFoundation.

### What are page assignments?

Page assignments are a quick way of giving one or more users informal responsibility and ownership of a page. They are very similar to a watchlist. A user can add a page to their watchlist themselves, but users also create page assignments for each other.

Page assignments do not change the behavior of the page or grant special rights on a page. For example, the page does not get locked for editing when it is assigned to another user. It is rather a simple mechanism to have users “take a look” at a page. If the feature Read confirmation is activated for a namespace, assigned users have to confirm with a checkbox on the page that they have read the page.

### Characteristics

- Assigned users receive notifications when their page assignment is changed. (This can be deactivated in the user preferences.)
- Assigned users are listed under the assignments for the page in the Quality management menu of the page.
- The page is listed on the Assignment management page, which is accessed from Global actions > Management (Special:ManagePageAssignments)
- The page is listed on the Assignments manager page of the assigned user, which is easy to access from the user profile menu.
- **Namespace-specific:** if a namespace has Read confirmation activated, the page shows a read confirmation in the alert area of the page.

### Assigning a page

To assign pages to other users, you need the appropriate rights. These are assigned via the roles reviewer and maintenanceadmin. Although users with read permissions can be assigned to a page, they cannot make changes to the page.

**To assign a user or a group to a page:**

1. **Click** on Page assignments in the Quality management toolbar.
2. **Type** a user or group name in the assignments text box. You will get automatic suggestions based on your entry.

3. **Click** the *Add* button.

4. **Add** more users or groups (optional).

---

**Assignment management**

Users with assignment rights can see a list of all pages that have assignments. This page (*Special: ManagePageAssignments*) can be loaded from the navigation menu under *Global actions > Management > Assignment management*
My assignments

Every user can view the pages they are assigned to by clicking on "Assignments" in their personal menu (by clicking on their image in the upper right corner).

Related info

- Reference page
The extension **BlueSpiceFoundation** is the interface between BlueSpice and Mediawiki. It provides basic functions for the individual BlueSpice extensions.

If you install any BlueSpice extension in a MediaWiki environment - that is outside of BlueSpice free or BlueSpice pro - the reference information for the extension will indicate if it requires BlueSpiceFoundation.
