BlueSpiceSmartList

BlueSpiceSmartList introduces various tags that can be placed on any page to show a list of the most relevant pages based on different criteria.

## Usage / features

The tag *newbies* shows the latest added user accounts. The *toplist* tag shows the most popular content pages.

The tag *smartlist* accepts the following parameters:

- categories to show
- whether to show comments
- number of results
- namespace
- sort order
- time period
- show minor changes
- show page title with namespace
