BlueSpice stores your content in a database for which you need to install a corresponding server. The steps listed here are required.

## Installing MariaDB

Install MariaDB via Aptitude:

```
apt update; \
apt install mariadb-server mariadb-client; \
apt clean
```

## Create database user for BlueSpice

After installation, immediately create a database user for MariaDB directly with the following command:

```
mysql -e "GRANT ALL ON bluespice.* TO 'bluespice'@'127.0.0.1' IDENTIFIED BY '<ein Passwort Ihrer Wahl>';"
```

## Next Step

If you have completed all steps successfully, you can proceed to the next step "Jetty".
