7.7 Extension/BlueSpiceCategoryCheck

The extension **CategoryCheck** reminds users to assign a category to a page before saving it.

**Using the category check**

To use this feature, it must first be enabled for individual namespaces in the **Namespace manager**.

When saving a page in a namespace that has the category check enabled, the user is reminded to assign a category before saving. This message only appears if the page does not have at least one category assigned. The page can still be saved without assigning a category, but the user must explicitly check the "Ignore" checkbox.
With **CategoryCheck**, pages cannot be saved unless a category is assigned to a page. This extension reminds a user to assign a category to a page before saving it.
Usage/Features

This functionality can be assigned to a namespace in the NamespaceManager.

Technical information

Configuration

This extension has no configuration options.

Rights (permissions)

This extension requires no special rights.
