7.8 Extension/BlueSpiceReadConfirmation

The extension **ReadConfirmation** allows to request read confirmations from users. If a user is assigned to a page, a mandatory read confirmation can be added to the page.

### Enabling read confirmations

An administrator must enable read confirmations for the namespace the page belongs to. This can be set using the **Namespace manager**:

[Activating read confirmations in a namespace]

Display

When read confirmations are active on a namespace, assigned users see a confirmation prompt. After checking the checkbox *Yes, I have completely read this article* and clicking *Confirm*, the page will be marked as read by that user.

Administration of read confirmations

Wiki admins can see an overview of all read confirmations by navigating to *Global actions > Management > Assignment management*. Read confirmation information is shown in the column *Read on*. A page can have multiple states:

- **Read confirmation not enabled**: BlueSpiceReadConfirmation is not enabled for the namespace to which the page belongs.
- **Not read**: BlueSpiceReadConfirmation is enabled, but the assigned users have not yet read the page.
- **Actions**: In the columns for actions, there are two items related to read confirmations.
  - *Read confirmation log*: Link to the read confirmation log for the page.
  - *Request read confirmation*: Users get a reminder for their read confirmation.
