9.6 Extension/BlueSpiceSocialArticleActions

Each time a page is created or edited in the wiki, this action is automatically documented as a separate page in the SocialEntity namespace. Its purpose is to track all actions on a wiki page and communicate it in various change lists for users to comment on the changes.

Charles of SocialEntity pages

Characteristics of SocialEntity pages

(1) **Numeric page names:** The page names in this namespace are generated as numbers.

(2) **Watchlist:** These pages are automatically placed on the watchlist of the editor. By default, a notification is sent when a comment is created on this page or when another change is made on this SocialEntity page. These notifications can be turned off in the Preferences on the Notifications tab *(Comments on watched entities).*
(3) **Comments:** Other users have the option to comment on the original action. For example, if a user edited a page, another user could comment that the page now looks much better. Adding a comment to the SocialEntity page is sometimes better than adding a discussion topic directly on the edited page to avoid cluttering up the wiki page with casual social comments.

(4) **Page link:** The SocialEntity page has a link that leads to its associated content page.

## Special pages that list actions on wiki pages

### User profile

The user profile pages lists the actions of the current user.

### Contributions

The page `Special:Contributions/<username>` shows the SocialEntity pages for actions of the user `<username>`.

The SocialEntity entries start with parentheses describing the type of change, e.g. `(Article edit)`. Hovering over the link shows the numeric page name in the namespace `SocialEntity`.

<table>
<thead>
<tr>
<th>Timestamp</th>
<th>Author</th>
<th>Action</th>
<th>Title</th>
<th>Diff</th>
<th>Hits</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>14:21, 26 April 2020</td>
<td>(diff</td>
<td>hist)</td>
<td>(current)</td>
<td>Testing BlueSpice Features</td>
<td>(+346)</td>
<td>N</td>
</tr>
<tr>
<td>14:14, 26 April 2020</td>
<td>(diff</td>
<td>hist)</td>
<td>(current)</td>
<td>Sandbox</td>
<td>(+327)</td>
<td>N</td>
</tr>
</tbody>
</table>

**SocialEntities on the Contributions page**

These pages can be filtered out by setting the filter to:

- Namespace:SocialEntity
- Invert selection

After clicking `Search`, the page returns the contributions of the user without social entities.
Filtering SocialEntity pages

**Recent changes**

The page *Special:RecentChanges* (classic view) by default filters out SocialEntity pages. The filter can be deactivated on the page.

**Special page "Activities"**

The page *Special:Activities* shows a list of all page actions in the wiki. The filter can be adjusted as needed. Using the **timeline** tag, the (custom) filtered list can be embedded in any wiki page.
