Description

FlexiSkin allows you to customize the skin of your wiki. Change the design of your wiki via the backend and with a preview function. Choose between different colours, insert your own logo and decide if you want to have the navigation at the left or right side.

Usage / Features

Create and choose a skin for your wiki.

- Change the background color or insert a background image.
- Upload and position an individual logo.
- Manage the position of the navigation bar.
- Set the overall width of the content area.

Technical information

Configuration

This extension offers no configurations.

Rights (permissions)

Users need "flexiskin-viewspecialpage" permission to see FlexiSkin special page. Users must have "flexiskinedit" permission to edit the skin.

Requirements

FlexiSkin requires [BlueSpiceFoundation](#).

User manual
