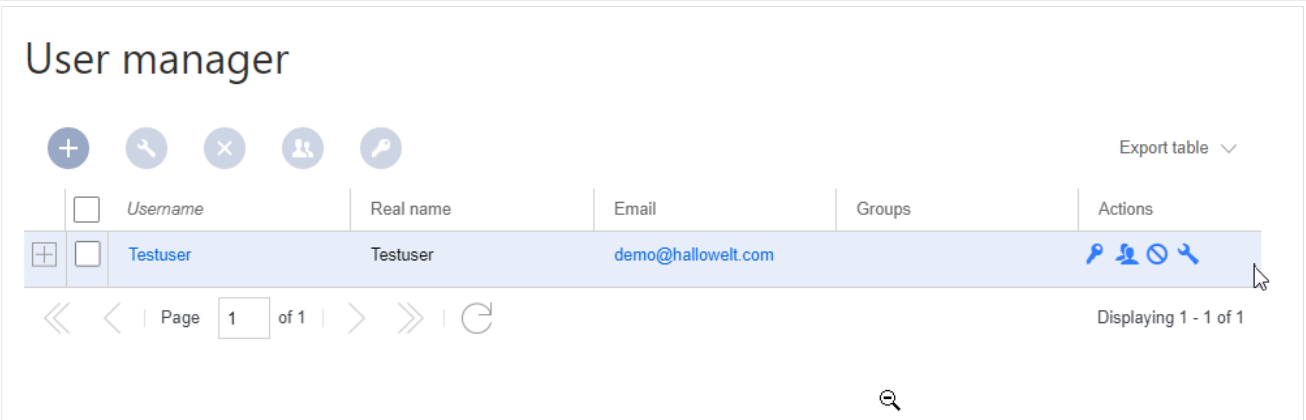
About the User manager

Administrators can access the User manager in the Global actions menu under *Management > Users (*link to page *Special:UserManager).* It shows an editable list of all user accounts.

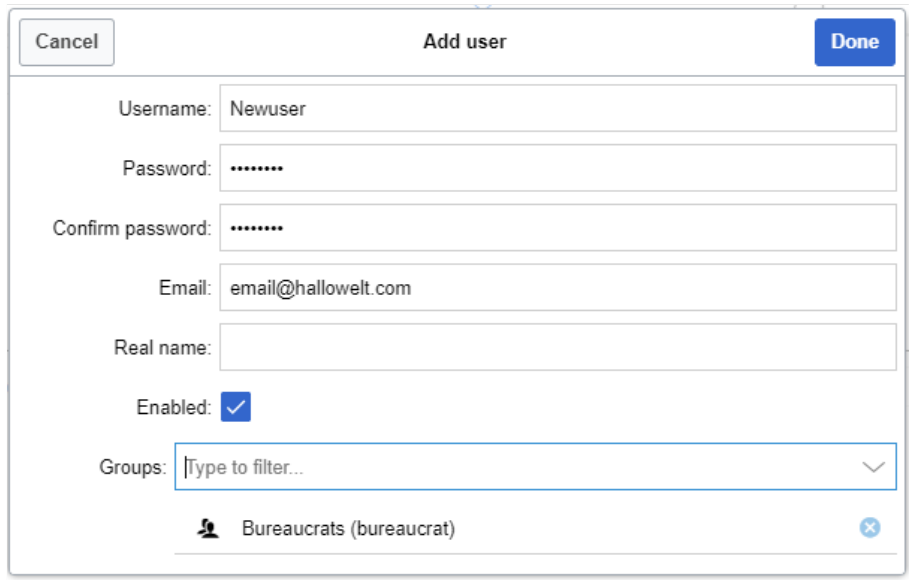


User manager page

Create a user account

To create a user account:

1. **Click** the "+"-button. This opens a dialog.



Create a user account

2. **Enter** the user information in the dialog:
   - *Username:* must be unique and cannot contain special characters
   - *Password and Confirm password:* The password for the new user.
   - *Email:* The email address of the user (optional)
   - *Real name:* can be a duplicate of an existing user's real name (optional)
   - *Enabled:* if checked, user account is active

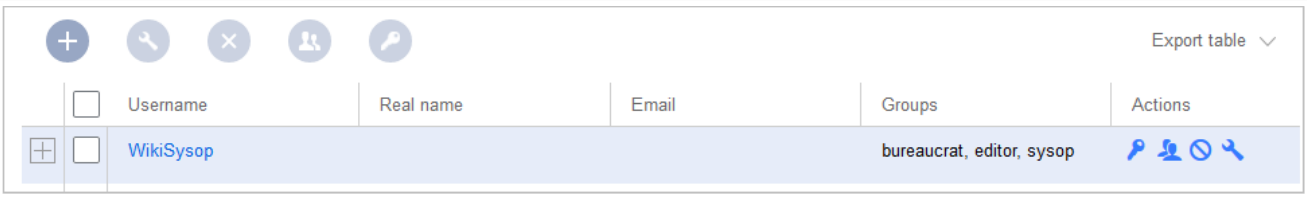
- Groups: a user can be assigned to multiple groups. If no group is selected, the user belongs to the default group *user*.

3. Click **Done** to create the user account.

Tip: If you do not want to provide the new user with a password that is known to you, you can create the user account via the page *Special:CreateAccount* instead. It is, however, not possible to assign a user group to the new account during account creation on that page.

Edit a user account

The tools for editing a user are shown in the table grid when hovering over or selecting the user from the list.



Edit a user account

- *Key icon:* change the password.
- *People icon:* Assign groups to this user account.
- *Block icon:* Disable/enable user account. A user account cannot be deleted.
- *Wrench icon:* edit email and real name

Tip: User groups can be set for multiple users at the same time by selecting the users and clicking on the "groups" icon above the grid. This resets the groups for the selected users and assigns the newly chosen groups.

Inactive users

By default, the list displays users with active user accounts (enabled).

To view inactive users:

1. **Click** on the table header (any column).
2. **Select** "Columns", then select "Enabled". This will add additional column "Enabled" to the grid.
3. **Click** on the header of this column and **select** *Filter > Show all deactivated users*.

Note: User accounts cannot be deleted. They can only be disabled.
