## Category check

The category check requires users to confirm the categorization of the article each time the page is saved.

### Activating the category check

---

To use this function, an administrator must first activate this feature in the **namespace manager** for a selected namespace.

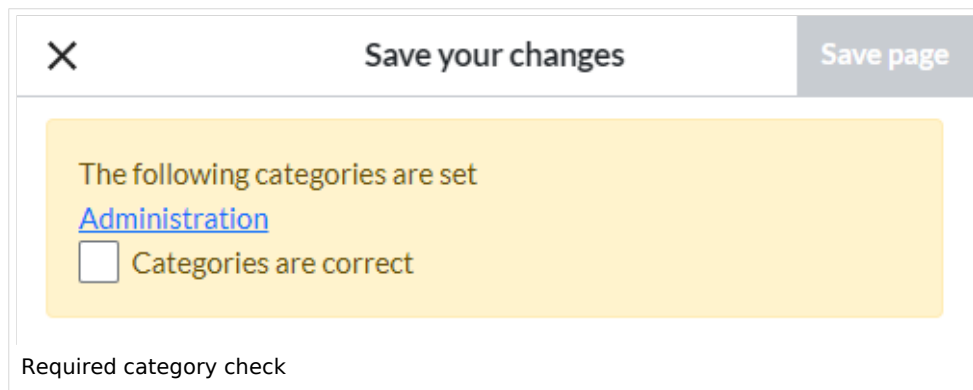

Activating the category check

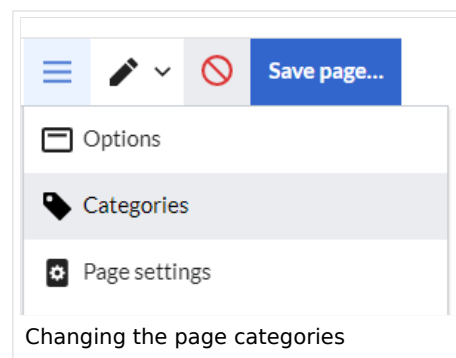

### Checking the categories of a page

---

When a user is ready to save a page with category check enabled, the confirmation has to be checked so that the page can be saved:

If the user wants to update the categories before saving the page, the dialog can be closed by clicking the x-button in the left corner. The categories can be updated from the options menu of the editor toolbar:

## Features

With **CategoryCheck**, pages cannot be saved unless a category is assigned to a page. This extension reminds a user to assign a category to a page before saving it.

This functionality can be assigned to a namespace in the [NamespaceManager](#).

## Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

## Requirements

MediaWiki: 1.36.0  
BlueSpiceFoundation: 4.1

## Integrates into

- BlueSpiceVisualEditorConnector

## Special pages
