Latest revision as of 14:55, 18 May 2022

In BlueSpice 4, an additional custom menu is integrated as a mega menu. This menu can be created and edited by users with admin rights. The link-icon (1) is only displayed once the corresponding page has been created.

Create the custom menu

To create the menu :

Open the page `MediaWiki:CustomMenu/Header` .

Create the first menu header. Menu headers are marked with a single asterisk (*);

```
* Important pages
```

Add the links for this menu header. Links are marked with two asterisks (**) and have the following syntax:

```
** target page|label
```

Example:

```
* Important pages
** Special:Blog|Blog
** IMS:Policies|Policies
* BlueSpice
** https://bluespice.com|BlueSpice Homepage
** https://bluespice.com/category/news-know-how|News
```

After the custom menu has been created, it can now be modified directly via the *Edit menu* link (see screenshot above).

Delete the custom menu

To remove the custom menu link-icon from the wiki, the `MediaWiki:CustomMenu/Header` page must be deleted. The page can be restored via the deletion log.

How does the main navigation work?

By default, some links are provided as entry points to the wiki. Wiki administrators can deactivate these links in the [configuration manager](#) if needed. In addition, custom links can be added here. Please note that no hierarchical links can be created. Therefore, it makes sense to mainly set up links to the most important topics and to portal pages that contain additional links or page lists.

Adding links

To add new links:

Open the page *MediaWiki:Sidebar* from the browser's address bar.

Change to edit mode.

Create one or more navigation links (with or without section heading). The following example shows a link to the page "Company" with the label "Our company" and an external link to the BlueSpice website with the label "Website". The links are grouped together under the section heading "Quicklinks":

```
*Quicklinks
**Company|Our company
**https://www.bluespice.com/de|Website
```

Save the page. The links are now shown in the main navigation.

Note: As soon as you have created at least one additional link, a direct edit link to the *MediaWiki:Sidebar* page is displayed when you move the mouse over such a link (see screenshot above).

Link labels may collide with system messages. If this is the case, simply append the HTML-code for an empty space to the description:

```
**Portal|Portal&#160;
```

Deactivating standard links

The standard links can be deactivated in the [configuration manager](#). The following settings are available under *Feature > Skinning*:

BlueSpiceBookshelf:

Show entrypoint "Bookshelf"

BlueSpiceDiscovery:

Show entrypoint "Mainpage"

Show entrypoint "All pages"

Show entrypoint "Recent changes"

BlueSpiceSocial:

Show entrypoint "Timeline"

BlueSpiceSocialBlog:

Show entrypoint "Blog"

Group-specific navigation

It is possible to show navigation elements for specific user groups only. Please note that the pipe symbol (|) between the page name and its label has to be escaped as `{{!}}` within this function. This syntax is defined in the extension [UserFunctions](#).

```
{{#ifingroup:sysop,widgeteditor |
*Test2
**somepage{{!}}Some page
|}}
```

Additional customizations

The extension **UserSideBar** lets users create their personal sidebar navigation.

Contents

1	Accessing the personal navigation	10
2	Default content	10
3	Customizing the sidebar	10
4	Related info	10

Accessing the personal navigation

File:UserSidebar1a.png
Personal navigation

Every logged-in user has their own UserSidebar. It is located in the left navigation as the *Personal navigation* tab (clipboard icon).

Default content

Initially, for users who haven't customized their personal sidebar, the navigation shows the following widgets:

Pages visited (widget PAGESVISITED)

My edits (widget YOUREDITS)

Watchlist (widget WATCHLIST)

These widgets can be removed individually when a user customizes the sidebar.

Customizing the sidebar

To customize the content of this sidebar, click on *Edit sidebar* at the bottom of the sidebar after hovering over any menu item. This opens the page *User:<username>/Sidebar*.

The syntax used to define the sidebar corresponds to the main MediaWiki sidebar (MediaWiki:Sidebar). Entries starting with a single star ("*") are considered menu headings or sections while entries with two stars ("**") are considered menu items.

```
* My favourite pages
** [[Wiki_Page1|Label]]
** [External_Page2 Label]
```

The sidebar can contain multiple sections. Also, users can use widgets to display predefined lists of pages, as described above. Widgets should be inserted as sections (with one star), like:

```
* WATCHLIST
* My custom section
** [[Page1]]
...
```

Extension\: BlueSpiceCustomMenu

[all extensions](#)

Overview			
Description:	Provides customizable menus		
State:	stable	Dependency:	BlueSpice
Developer:		License:	GPL-3.0-only
Type:	BlueSpice	Category:	Search and Navigation
Edition:	BlueSpice pro, BlueSpice free, BlueSpice Farm, BlueSpice Cloud		
View help page			

Features

CustomMenu is a menu with configurable items. It appears as collapsible menu above the top navigation bar. The HTML output is an unordered list. Menu items can be modified by editing the page `MediaWiki:CustomMenu/Header`.

Syntax:

```
target page {{!}} label
```

Example:

```
* Hello World
** Intranet {{!}} Our Intranet
** https://en.demo.bluespice.com {{!}} Demo
```

BlueSpiceCustomMenu will be hidden on mobile devices. The width is restricted to the content width. It is limited to one line.

Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

Requirements

MediaWiki: 1.35.0
BlueSpiceFoundation: 4.0

Integrates into

BlueSpiceCustomMenu

Special pages

Configuration

Name	Value
CustomMenuHeaderNumberOfLevels	2
CustomMenuHeaderNumberOfMainEntries	10
CustomMenuHeaderNumberOfSubEntries	10
