## Overview

By default, some links are provided as entry points to the wiki. Wiki administrators can deactivate these links in the [configuration manager](#) if needed. In addition, you can also add new links below the entrypoints (admin permissions required). Please note that no hierarchical links can be created. Therefore, it makes sense to mainly set up links to the most important topics and to portal pages that contain additional links or page lists.

## Editing the main navigation

### To open the menu editor:

1. **Click** *Edit sidebar* at the bottom of the navigation menu. If the page does not exist yet, you will see a notice on the page.

### Menu editor

Visual menu editor is available from BlueSpice 4.2.

### To add a new menu header using the menu editor:

1. **Click** *Add new element* to create a new menu header.

+ Add new element

Add a new menu heading

2. **Enter** the text for your menu header. In a multilingual wiki, you can also enter a [message key](#).

Cancel

Edit text or message key

Text or a message key

Topics \*

Enter a heading name

3. **Click** Done.

### To add links:

1. **Select** *Add new subitem* from the dropdown menu of the menu header.

Quicklinks

Edit node

Remove

Add new subitem

add a link as a new subitem

2. Enter the page name as the link target and the label that you want to show:

Cancel

Edit element

IMS:Process descriptions \*

Link label

Processes \*

enter link info

3. **Click** Done.
4. **Repeat** steps 1-3.
5. **Click** *Save changes*.

**Note:** If you use the parser function `{{#ifingroup:...` to display navigation elements in the source code, you must always edit the main navigation in the source code. In visual editing mode, saving removes any parser function or semantic queries.

## Source edit mode

### To add new links:

1. **Change** to source editing mode.
2. **Create** one or more navigation links (with or without section heading). The following example shows a link to the page "Company" with the label "Our company" and an external link to the BlueSpice website with the label "Website". The links are grouped together under the section heading "Quicklinks":

```
*Quicklinks
**Company|Our company
**https://www.bluespice.com/de|Website
```

3. **Save** the page. The links are now shown in the main navigation.

Link labels may collide with system messages. If this is the case, simply append the HTML-code for an empty space to the description:

```
**Portal|Portal&#160;
```

## Deactivating standard links

---

The standard links can be deactivated in the [configuration manager](#). The following settings are available under *Feature > Skinning*:

BlueSpiceBookshelf:

- Show entrypoint "Bookshelf"

BlueSpiceDiscovery:

- Show entrypoint "Mainpage"
- Show entrypoint "All pages"
- Show entrypoint "Recent changes"

BlueSpiceSocial:

- Show entrypoint "Timeline"

BlueSpiceSocialBlog:

- Show entrypoint "Blog"

## Group-specific navigation

---

It is possible to show navigation elements for specific user groups only. Please note that the pipe symbol (|) between the page name and its label has to be escaped as `{{!}}` within this function.

This syntax is defined in the extension [UserFunctions](#).

```
{{#ifingroup:sysop,widgeteditor |
*Test2
**somepage{{!}}Some page
|}}
```

**Note:** Anytime the page is saved using the visual menu editor, the parser function will be overwritten and no longer works!

## Additional customizations

---

- [Alignment for navigation with long link labels](#)
- [Display icons with navigation links](#)
- [Multi-language navigation](#)
