

Read confirmation

Namespaces can be configured so that a read confirmation is requested from users that assigned to a page when a page has a new version. A confirmation prompt will then appear for all assigned users.

- *Not read*: Not all assigned users have read the page.
- *Read*: All assigned users have read the page.
- *Actions*: In the columns for actions, there are two items related to read confirmations.
 - (1) *Read confirmation log*: Link to the read confirmation log for the page.
 - (2) *Request read confirmation*: Users get a reminder for their read confirmation.
 - (3) *View the status of read confirmations (eye icon)*: A list of assigned users and the status of their read confirmations.

Read confirmations and page approvals

If the approval feature is activated in a namespace at the same time, the read confirmation is triggered when a new draft is created. This [can be changed via server configuration](#) so that the read confirmation is required after the draft page has been approved.
