## Generate page lists (smart lists)

The extension **SmartList** allows to insert a list of pages in a wiki page using the tags *smartlist*, *newbies*, or *toplist*. The selection criteria can be set using a dialog box.

### Contents

1 Available tags .....	3
2 Smartlist .....	3
2.1 Parameters .....	4
2.2 Wikitext editing .....	5
3 Newbies .....	5
3.1 Parameters .....	6
3.2 Example in wikicode .....	6
4 Toplist .....	6
4.1 Parameters .....	6
4.2 Example in wikicode .....	6

## Available tags

The extension SmartList includes three different tags:

- `<bs:smartlist />` / `<recentchanges />` - display a list of pages that were edited in the last 90 days. It can be filtered by namespaces or categories.
  - Different modes are possible if the `<bs:smartlist />` tag is added in source edit mode.
- `<bs:newbies />` - display a list of recently registered users.
- `<bs:toplist />` - display a list of most visited pages.

The tags can be added as content droplets. v4.3+ . Earlier BlueSpice versions contained the menu item *Insert > Magic word* in [VisualEditor](#). -v4.3

## Smartlist

The `<bs:smartlist />` tag shows a list of recently changed pages (<90 days) by default.

The list can be inserted in source edit mode or as the [content droplet](#) "Recent changes", in which case it is inserted as `<recentchanges />` tag in the page source. v4.3+

The screenshot shows the BlueSpice interface with a menu on the left containing items like 'Generate page lists (smart lists)', 'Manual:Wikitext', 'Manual:Quality management', 'Reminders', 'Extended search', 'Tasks', and 'Content planning'. The main area displays a 'Recent changes' dialog box with various configuration options. The dialog has a title bar with a close button (X) and an 'Insert' button. The options include: 'Count' (set to 7), 'Namespace(s)' (set to ,Manual), 'Category' (empty), 'Category mode' (dropdown), 'Show minor' (toggle), 'Period' (dropdown), 'Show only new articles' (toggle), 'Heading' (text input), 'Sort by' (set to Time), and 'Sort order' (dropdown). A 'Save changes...' button is visible in the top right of the interface.

Options of the content droplet "Recent changes"

In source edit mode, the *smartlist* tag (not the *recentchanges* tag!) additionally accepts the [parameter mode](#) with the following values:

- mode=stablepages
- mode=whatlinkshere

## Parameters

The SmartList inspector allows to set the following parameters:

Label	Parameter	Values	Description
Count	<b>count</b>	number	The number of articles to be shown. Default value: 5
Namespace(s)	<b>ns</b>	number or name	Only articles from given namespace will be listed. The namespaces can be entered by IDs or by names. Several namespaces can be separated with commas: ns="0,2,5" or ns="Help,User,Test". Default: All namespaces are included.  <b>Note:</b> Only content namespaces are included in the list.
Category	<b>cat</b>	name	Only articles from given category will be listed. Selecting several categories is not possible. Default: All categories.
Category mode	<b>catmode</b>	AND, OR	Show pages if they are in at least one of the categories (OR) or show pages if they are tagged with all categories (AND).
Show minor	<b>minor</b>	true, false	Minor changes (changes marked with an "m" in the recent changes) will not be listed. Default: Minor changes are listed.
Period	<b>period</b>	-, month, week, day	Only changes within given period are shown. Default: No limit is set (full 90 days are shown).
Show only new articles	<b>new</b>	true, false	Only new pages will be listed. Default: All pages are shown
Heading	<b>heading</b>	text	Adds a heading above the list
Sort by	<b>sort</b>	Title, Time	Sort results by title or by latest edited.
Sort order	<b>order</b>	asc, desc	Ascending or descending sort order.
Trim	<b>trim</b>	number	Long article names are not cropped. Default: The title is cut off after 30 characters.
	<b>showtext</b>	true,	

Show text		false	With this option, a line of the article contents will be shown alongside the title.
Trim text	<b>trimtext</b>	number	"trimtext" sets the number of characters of an article's content shown. This is only relevant when <i>showtext="true"</i> ). <i>Note</i> : trimtext="0" is <u>not</u> possible.
Show namespaces	<b>shows</b>	true, false	If true, the namespace prefix is shown with the page names.
Number with text	<b>numwithtext</b>	number	Anzahl der Artikel die mit Einführungstext angezeigt werden sollen. Nur effektiv wenn <i>showtext=true</i>
Meta	<b>meta</b>	true	The username and date for the last edit are shown.
Target	<b>target</b>	-	Obsolete
Exclude namespace (s)	<b>excludens</b>	number or name	Articles from given namespaces will not be shown. The namespaces can be entered by IDs or by names (comma-separated). Default: All namespaces are included.

## Wikitext editing

Here you see a syntax example with some parameters. These can only be added in source edit mode.

15 of the pages from the category *ISO9001* that were changed in the last 90 days are displayed in alphabetical order.

```
<bs:smartlist sort="title" cat="ISO9001" count="15" heading="Pages about ISO 9001" / >
```

If the approval feature is activated, the list can be set to include the latest [approved pages](#) (instead of edited pages:

```
<bs:smartlist period="week" sort=" time" shows="0" mode="stablepages" count="8" />
```

Alternatively, the smartlist can also display a list of pages that link to a wiki page. The corresponding page name is specified as `target` :

```
<bs:smartlist mode="whatlinkshere" target="Main Page" />
```

## Newbies

The tag `<bs:newbies />` shows recently registered wiki users.

The list can be inserted as the [content droplet](#) "New users". v4.3+

## Parameters

Label	Parameter	Values	Description
Count - <b>count</b>			The number of users to be shown; the default value is 10.

## Example in wikicode

```
<bs:newbies count="7"/>
```

## Toplist

This tag shows a list of the most visited pages.

The list can be inserted as the [content droplet](#) "Most visited pages". v4.3+

## Parameters

Label	Parameter	Values	Description
Count	<b>count</b>	number	The number of articles to be shown; the default value is 10.
Namespaces	<b>ns</b>	text, text	Only articles from these namespace will be shown. You can put several namespaces here, separated by commas.
Category	<b>cat</b>	text, text	Only articles from this category will be shown. You can put several categories here, separated by commas.
Period	<b>period</b>	month, alltime	The period that should be used. The default is alltime.

## Example in wikicode

```
<bs:toplist count="7" ns="Help|QM" />
```

# Content Droplets

\* ContentDroplets is available from BlueSpice 4.3.2.

## Contents

1 Adding a droplet to a page .....	8
2 List of droplets .....	8
3 More info .....	18

To insert additional functionality in a wiki page, you can use Content droplets. Content droplets include tags that were previously accessed from *Insert > Magic word* in the editor toolbar. They also provide access to some templates that are preconfigured in the wiki, such as message boxes.

## Adding a droplet to a page

To add a droplet to a page:

1. **Click** the Content droplets icon in the editor toolbar or type `<<`.
2. **Search** for a droplet name in the search bar of the droplets menu or browse the droplets by category.

3. **Select** a droplet
4. **Click** *Insert*.

**Note:** Some droplets open an inspector menu which contains another *Insert* button. Be sure to confirm that button as well.

Based on the type of droplet, you can continue with configuring the droplet as needed.

## Page approvals (Acceptance)

\* ContentStabilization is available from BlueSpice 4.3. Up to version 4.2, approvals are handled by the extension [FlaggedRevs](#).

The **ContentStabilization** extension is a MediaWiki extension that activates an approval mechanism. New versions of a page are initially marked as drafts. These remain in place until a user with approval rights reviews and approves the page.

### Contents

1	Enable page approval .....	20
1.1	Existing Pages .....	20
1.2	First drafts .....	21
1.3	Drafts .....	21
2	Accepting a page .....	21
3	Configuration .....	22
3.1	Changes to templates, embedded files and transclusions .....	22
3.2	Reading permissions for drafts .....	31
3.3	Read permissions for first drafts .....	32
3.4	Summary: Read Permissions for Draft Pages .....	32
4	Quality management overview .....	33
5	Approving a page when the title area is hidden .....	34
6	Related info .....	36

## Enable page approval

Drafts are activated via the namespace administration. A user with administrator rights checks whether *Approval* is enabled for a namespace. This is done under *Global Actions > Administration > Namespaces*.

Click the edit icon (wrench) in the *Actions* column. The namespace dialog opens. Select approval and click *Done*.

## Existing Pages

After *Approval* is activated for a namespace, all existing pages in the namespace appear in draft mode. The pages now show the status *First draft*.

By default, the page status is displayed in the title area of every page with approval function .

Alternatively, the status info can be moved below the page content from the [Config manager](#).

## First drafts

When a new page is created and saved for the first time, it will appear as **first draft**. By default, first drafts are visible to all users with read permissions. However, this can be restricted to individual user groups from the [Config manager](#).

## Drafts

If a page is edited and saved multiple times in draft mode, each edit is logged in the page history:

• ([cur](#) | [prev](#)) ● 14:04, 4 November 2019 [WikiSysop](#) ([talk](#) | [contribs](#) | [block](#)) .. (1,332 bytes) (+486) .. (Tag: Visual edit) [[pending review](#)]

• ([cur](#) | [prev](#)) ● 14:03, 4 November 2019 [WikiSysop](#) ([talk](#) | [contribs](#) | [block](#)) .. (846 bytes) (+213) .. (Tag: Visual edit) [[pending review](#)]

• ([cur](#) | [prev](#)) ○ 13:36, 4 November 2019 [WikiSysop](#) ([talk](#) | [contribs](#) | [block](#)) [m](#) .. (633 bytes) (+38) .. (Tag: 2017 source edit)

[Reviewed: 13:57, 4 November 2019 | [WikiSysop](#) | Everything looks correct.]

• ([cur](#) | [prev](#)) ○ 12:45, 4 November 2019 [WikiSysop](#) ([talk](#) | [contribs](#) | [block](#)) .. (595 bytes) (+595) .. (Created page with "*FlaggedRevs* is an extension to the MediaWiki software that allows a wiki to monitor the changes that are made to pag...") (Tag: Visual edit)

[Compare selected revisions](#)

Drafts are shown in the revision history

Drafts are highlighted in color in the version history. In addition, they are marked with "Release pending".

## Accepting a page

A user with [reviewer permissions](#) can approve the page from the status message in the title area of the page. The approval comment is logged in the page's version history.

Approval from the title area

The new approval status is shown accordingly in the title area.

Approved page status

## Configuration

---

The following settings are made in the [Config manager](#) in combination with namespace settings.

### Changes to templates, embedded files and transclusions

If a page uses templates or contains other files such as images and embedded PDFs, or if content from other pages is transcluded and modified after the page was approved, those changes must also be approved. There are two mechanisms to accomplish the approval:

1. **The embedded resource is in a namespace without approval mechanism:** If the embedded resource is in a namespace without its own approval function, the approved version of the page shows the resource version that was embedded at the time of the page approval. An implicit draft version shows the most recent version of the embedded resource.
2. **The embedded resource is in a namespace with approval mechanism:** The approval is done directly for the resource itself to avoid approval on all affected content pages.

**Important!** If the approval mechanism is activated in a resource namespace (e.g. Template, File) in retrospect, all existing pages in the resource namespace are then in first draft. If the wiki is configured so that not all users can see drafts, the resources may need to be initially approved via server script if this cannot be accomplished manually.

## Reading permissions for drafts

By default, all users can see a page's drafts, including users with only read permissions.

To hide drafts from users, the *user* group must be removed from the configuration. This setting then applies to the entire wiki and cannot be further restricted to specific namespaces.

An administrator changes the groups that can see drafts in the *Show draft versions for the following groups* box.

**Warning!** If the group *user is off* is removed from the configuration, users in this group cannot see draft versions even if they are assigned a workflow task.

After removing the group *user*, the desired group(s), e.g. B. the group *editor*, can be added to the configuration and saved.

**Note:** If no user groups are specified in the configuration field, even users with share rights and sysop users will not see a visual status indicator of the page. Instead, you have access to drafts through the page's history.

In order for administrators to see the status directly on the page, they must be added to a group listed here in the configuration.

## Read permissions for first drafts

By default, first drafts are visible to all users who have read permissions in a namespace. However, if first drafts are only visible to those users who can generally view page drafts, this can be done in the configuration management by selecting *Allow viewing of first draft version for users who can normally not see drafts* to be disabled.

## Summary: Read Permissions for Draft Pages

### Define groups:

- **Group *user*:** Only the user groups that have been given this right in the configuration management can see first drafts and other drafts. By default, this is the user group (=all users who are logged into the wiki and have the appropriate reading rights in a namespace).
- **Adjust groups:** In the configuration management, the reading rights for (first) drafts can be restricted to other groups.
- **Group *sysop*:** Users in group *sysop* can always view drafts through the history. The sysop group can therefore not be set explicitly in the configuration. If *sysop* users can directly see the approval status on the page, they need to be added to a group with read permissions for drafts.

### Export draft pages:

- **Single page export:** Users with reading rights on a draft page can print it directly as a PDF.
- **Book export:** Only approved pages are exported. If there is only a first draft of a page, it will be exported. **Exception:** If the book is printed by a user who does not have access to the first draft, the first draft will not be printed out in the book. Instead, the PDF shows the following message:

### 13 MLR:Erm31730/firstdraft

You do not have permission to action-badaccess-group0, for the following reason:

You are not allowed to execute the action you have requested.

Permissions error PDF export

Effects on Semantic MediaWiki properties

If a namespace has SemanticMediaWiki [Semantic MediaWiki](#) activated, the following SMW queries are available depending on the approval status of the page:

Document state	Available properties
First draft	Current values
Approved	Values of the approved (stable) version
Draft	Values of the approved (stable) version (default setting)
Implicit draft <sup>[1]</sup>	Values of the approved (stable) version

The availability of the semantic properties is determined by the following configuration setting:

```
$bsgFlaggedRevsConnectorStabilizeSMWPropertyValues = true;
```

The value for this setting can be set to *false* in the *LocalSettings.php* of the server file system. If set to *false*, the property values of the draft version are used for semantic queries instead of the values for the stable version.

## Quality management overview

The Special page *Special:Quality\_management\_overview* allows all users with *reviewer* permissions to view and filter a list of wiki pages and their review status. Pages for which a user does not have read permissions are not shown.

### Quality management overview

Approval is currently enabled for the following namespaces: Test, File, DV\_Test\_2, VHNS, MOG2, Mein\_Namensraum and MLR

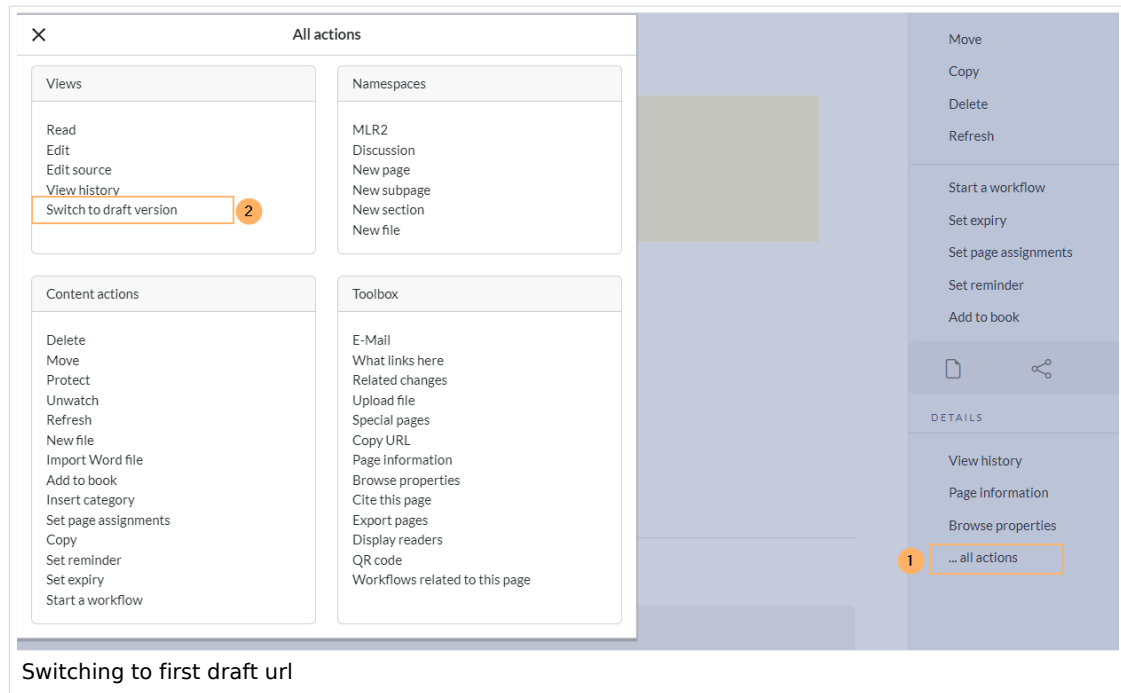

Page	State	In sync	Last approver	Last approval date	Comment from last approval

Special page "Quality management overview"

## Approving a page when the title area is hidden

When the title area is hidden, you can approve the page from the `...all actions` menu:

1. **Switch** to the draft version of the page (this not necessary when the page is in *First draft* status). v4.3.2+

Before v.4.3.2, this switch-link is not available. In that case, go to the page history and click on the latest time stamp to switch to the draft version of the page.

Edit

BlueSpice uses a slightly customized version of the MediaWiki extension [VisualEditor](#) as editing tool. This editor supports all common edit tasks that are useful in a wiki environment. You can refer to the official documentation for basic help. Here in the BlueSpice Helpdesk, we only give some hints and tips for using the editor.

8.3	<a href="#">Page options</a>	43
9	<a href="#">Troubleshooting: Visual editing is disabled</a>	45

## What is the visual editor?

The visual editor is optimized for editing wiki pages. Important characteristics and functions are:

1. **Page structuring** with headings.
2. Consistent **text formatting**.
3. **Linking** of contents.
4. **Inserting special content** (files/media, tables, templates, magic words)
5. Adjusting **page options**.

## Text editing

Typical text formatting options such as **bold**, *italics*, or **text color** are available as a context menu. When you highlight text, a menu with common formatting elements appears. For example, you can apply a different text color.

## Pasting content from your clipboard

If you paste content from your clipboard (e.g., copied from MS Word or MS Excel), you usually also paste many unnecessary formatting tags from the original application. To avoid, this you should paste the content as plaintext.

If you already pasted text which resulted in undesirable formatting, you can use the undo function in VisualEditor to remove the content again if you have not yet saved the page or switched between visual and source editing mode.

To paste content as plain text instead, use the shortcut `Ctrl+Shift+v`.

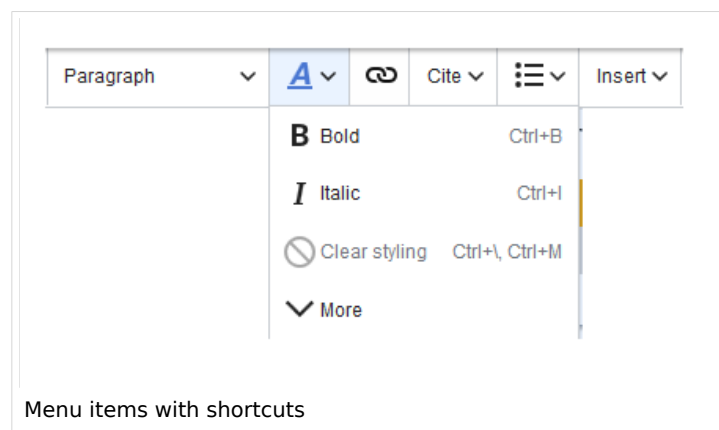

## Shortcuts

---

If you want to apply multiple formatting options at the same time, shortcuts are often the quickest way. For example, to show text in bold and italic, highlight the text and press **Ctrl+b** (for "**bold**") and **Ctrl+i** (for "*italics*"). Even a link can be quickly inserted by pressing **Ctrl+k**. Pressing **Ctrl+b** again will cancel the bold. Multiple formats can be removed after text selection with **Ctrl+m**.

All available keyboard shortcuts are marked accordingly in VisualEditor next to each menu item.

**Note:** For a list of all available shortcuts, click on "Keyboard shortcuts" in the Visual Editor help menu (the question mark menu item).

## Inserting other content

---

Many typical page elements such as images, files and tables can be integrated into your page from the *Insert* menu.

- File formats with a preview option: jpg/jpeg, png, gif, pdf
- File formats without preview option are always inserted as links (e.g., Microsoft Office formats)

If you want to learn more about inserting these elements, go to the following help pages:

- [Images](#)
- [Files \(PDF, xls, doc, ...\)](#)
- [Tables](#)

- [Templates](#)

## Wiki-specific content

---

Some functions in the *Insert* menu are little known from traditional word processing, but are quite typical for working with a wiki. Therefore, they are briefly introduced here. Find more information on the help pages here in the helpdesk or at [mediawiki.org](https://mediawiki.org):

- **Comment:** Add comments to the page. These are only visible in the source code.
- **Gallery:** A simple picture gallery can support many process flows.
- **Magic word:** Wiki features such as signature, word counter, category tree or even process diagrams with draw.io can be integrated as a "magic word".
- **Your signature:** Only works on pages that allow signatures. Pages in the Namespace "Pages" are not included.
- **Codeblock:** Programming code is displayed here in clean code blocks, optionally with line numbers.
- **References list:** Creates footnote references.
- **Chemical formula:** The formula rendering uses an external service via Wikimedia's REST API.
- **Math formula:** An editor opens for entering a mathematical formula.

## Switching between edit modes

---

When creating or editing a page, the page usually loads in visual editing mode. If you are familiar with the formatting language of MediaWiki ("[Wikitext](#)"), you can easily switch to source editing mode using the "Switch editor" menu item and edit your page content there:

## Hints and tips

---

VisualEditor is optimized for editing web pages. That's why it has exactly the features that are often needed to create a wiki page. The consistent formatting of content supports the readability of your wiki content.

## Text formatting

In the text formatting menu, the following additional options are available when a text passage has been selected:

*Text color:* different text colors can be selected via an inspector menu.

*Center align:* Text can be selected and centered paragraph by paragraph.

*Indent:* Text can be indented once (note: multiple indentation is only possible via the source text).

Text formatting	
Undo function	Left arrow: Undo last action (greyed out: there is no last action yet) Right arrow: Restore last action (greyed out: there's nothing to restore yet)
Format Paragraph	Here text can be defined as heading or specific paragraph type. <i>Note:</i> If you work in a <a href="#">table</a> , the options will change accordingly (content cell and header cell):
Style text	If no text has been selected before clicking on the " <b>A</b> " button and on a button, the text will be formatted from the current position of the cursor.

Text formatting	
	<p>(<a href="https://mediawiki.org/wiki/Help:VisualEditor/User_guide/en#Getting_Started:_The_VisualEditor-Toolbar">More Info at mediawiki.org/wiki/Help:VisualEditor/User_guide/en#Getting_Started:_The_VisualEditor-Toolbar</a>)</p>
<p>Insert hyperlink</p> 	<p>If no text was selected before the hyperlink dialog was opened, the link will be generated with a number:</p> <p><b>[1]</b> To subsequently change the hyperlink description, just click on the link to open the edit menu. In a table, you may need to double-click the cell first and then click the hyperlink again.</p>
<p>Cite</p> 	<p>The citation menu is used to insert footnote references within the text.</p>
<p>Structure</p> 	<p>Formats ordered and unordered lists. If paragraph breaks or images need to be inserted within a bullet point, use <b>Shift+Enter</b> to avoid creating a new list item.</p> <p>If you want to style numbered lists like 1, 1.1, 1.1.1, etc., you need to add some <a href="#">additional CSS instructions</a> to the page <i>MediaWiki:Common.css</i>.</p>

## Insert special content

Insert special content	
<p>Insert menu</p> 	<p>Use the "insert" menu to insert various media (images, videos) and text formats:</p>
<p>Media</p> 	<p>Inserting pictures and videos</p> <p>(<a href="#">Details on MediaWiki</a>)</p>
<p>Templates</p>	

Insert special content	
 Template	Include a <a href="#">template</a> in the page.
Tables  Table	<a href="#">Tables</a> are an important tool for formatting tabular page content.
Comment  Comment	Comments are not visible to readers, but only in edit mode. A comment can be inserted anywhere on a page. It is text-based and cannot be formatted.
Magic word -v4.2.x  Magic word	With a "magic word" you can insert certain wiki tags in your page. <a href="#">More about Magic words</a>
Gallery  Gallery	Allows to display a set of images as a gallery. Formatting examples for the different settings can be found at <a href="https://mediawiki.org/wiki/Help:Images#Gallery_syntax">mediawiki.org/wiki/Help:Images#Gallery_syntax</a>
Your signature  Your signature	This option allows to add your wiki signature (User name and timestamp) at any location in the page.
Code block  Code block	With code block various code examples can be entered, like e.g. in HTML syntax. The code is then displayed properly formatted: <div><pre>&lt;span style="color: red"&gt;red text&lt;/span&gt;</pre></div>
References list  References list	This menu item creates a <code>&lt;references /&gt;</code> tag at the location where it is inserted. The footnote references up to this point are then displayed at that location instead of the end of the page. Remaining footnotes in the page are still shown at the end of the page.
Chemical formula  Chemical formula	The formula rendering uses an external service via Wikimedia's REST API.
Math formula	It opens an editor for entering a mathematical formula.

Insert special content	
 Math formula	[[on MediaWiki]]
Special Characters 	Opens a panel to select special characters that are not available on your keyboard. To close the panel, click the menu item again.

## Page options

Page options	
 Options menu	The options menu allows editing of all page settings. It is not
Options  Options	This button allows the page settings and page information to be updated simultaneously within a dialog box. To change any page options on the page, you need to be in <b>visual editing mode</b> .
Categories  Categories	Here, you assign the page to one or more <a href="#">categories</a> while in edit mode.
Page Settings  Page settings	<p><i>Page redirection:</i> When the page is redirected, the content of the page is no longer displayed, but the target page is loaded directly.</p> <p><i>Show Table of Contents:</i> By default, a table of contents is shown if a page has more than three headings. You can use this setting to always force or suppress the table of contents.</p>
	<ul style="list-style-type: none"><li>• <i>Let this page be indexed by search engines:</i> Only applies to public search engines. The wiki's internal search is not affected.</li><li>• <i>Show a tab on this page to add a new section:</i> Not supported in BlueSpice 4 Discovery skin.</li><li>• <i>Display title:</i> Sets a title that is shown as page heading. It can be found by the search and is used in page lists created by <a href="#">Semantic MediaWiki</a> inline queries.</li></ul>

Page options	
<div>Advanced Settings</div> <div> Advanced settings</div>	<div><ul style="list-style-type: none"><li><i>Title visibility:</i> This setting hides the entire title section of a page and is often applied on the main page or other portal pages of the wiki. If the title is not visible, the edit button is also not available. In this case, you can click on <code>all actions... &gt; Edit</code> in the page tools.</li></ul></div> <div></div> <div>"all actions" Menu</div>
<div>Languages</div> <div> Languages</div>	<div><p>Shows wiki pages on different wikis that are connected via Interlanguage links. Depending on the wiki's skin, the links are shown in a specific location. In the BlueSpice 4 Discovery skin the interlanguage links are shown in the top menu.</p><div></div><div>Menu item to access interlanguage links</div><p><a href="https://mediawiki.org/wiki/Help:Links#Interwiki_links">mediawiki.org/wiki/Help:Links#Interwiki_links</a></p></div>

Page options	
Find and replace	Words or characters can be searched and replaced directly on the page. The "Undo" button can be used to cancel the change.
 Find and replace <span>Ctrl+F</span>	

## Troubleshooting: Visual editing is disabled

If you only have the source editing option in your editor toolbar, please contact an administrator of your wiki. The following settings must be checked in this case:

- Global settings via the [configuration manager](#)
- [Namespace manager](#) settings

## Overview

[? View user help page](#)

## Features

**BlueSpiceSmartList** allows to insert a list of pages by using the following tags:

- `<bs:smartlist />` / `<recentchanges />` - display a list of pages that were edited in the last 90 days. It can be filtered by namespaces or categories.
  - Different modes are possible if the `<bs:smartlist />` tag is added in source edit mode.
- `<bs:newbies />` - display a list of recently registered users.
- `<bs:toplist />` - display a list of most visited pages.

## Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

### Requirements

MediaWiki: 1.38.0

BlueSpiceFoundation: 4.1

### Integrates into

- BlueSpiceSmartList
- BlueSpiceUserSidebar
- ContentDroplets
- VisualEditor
