Overview

In BlueSpice 4, an additional custom menu is integrated as a mega menu. This menu can be created and edited by users with admin rights. The link-icon (1) is only displayed once the corresponding page has been created.

If you don't see the menu icon in your wiki, create the following page: `MediaWiki:CustomMenu/Header`

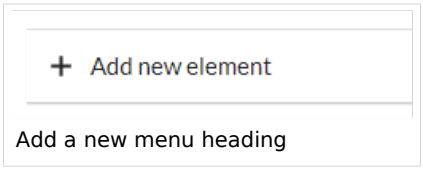

Custom menu: (1) open menu, (2) edit link, (3) menu items

Menu editor

Visual menu editor is available from BlueSpice 4.2.

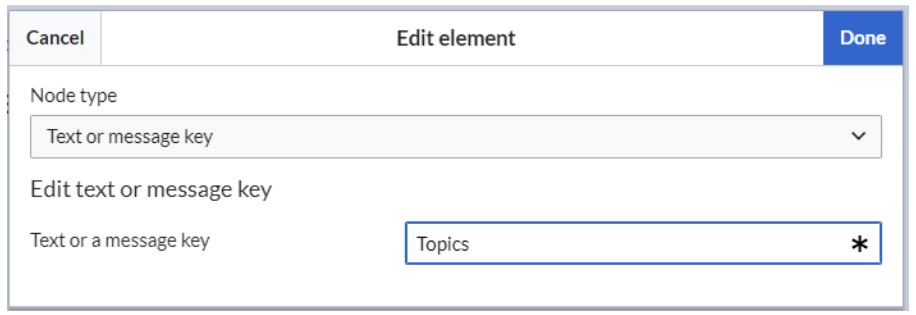

To add a new menu header using the menu editor:

1. **Click** *Add new element* to create a new menu header.

Add a new menu heading

2. **Enter** the text for your menu header. In a multilingual wiki, you can also enter a message key.

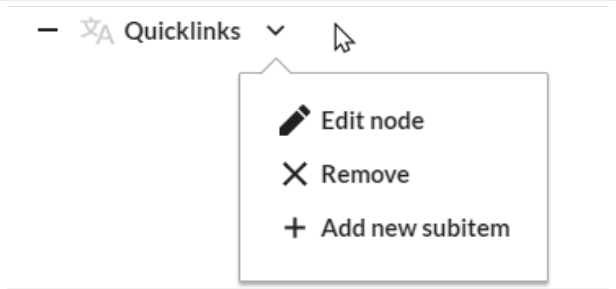

Enter a heading name

3. **Click** Done.

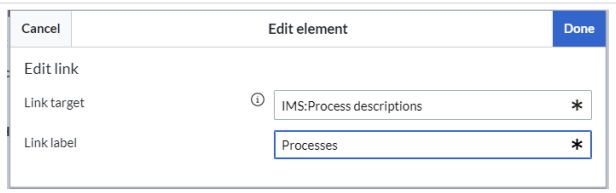

To add links:

1. **Select** *Add new subitem* from the dropdown menu of the menu header.

add a link as a new subitem

2. Enter the page name as the link target and the label that you want to show:

enter link info

3. **Click** *Done.*
4. **Repeat** steps 1-3.
5. **Click** *Save changes*.

Note: If you use the parser function `{{#ifingroup:...` to display navigation elements in the source code, you must always edit the main navigation in the source code. In visual editing mode, saving removes any parser function or semantic queries.

Source edit mode

To add new links:

1. **Change** to source editing mode.

2. **Create** one or more navigation links (with or without section heading). The following example shows a link to the page "Company" with the label "Our company" and an external link to the BlueSpice website with the label "Website". The links are grouped together under the section heading "Quicklinks":

```
*Quicklinks
**Company|Our company
**https//www.bluespice.com/de|Website
```

3. **Save** the page. The links are now shown in the main navigation.

Link labels may collide with system messages. If this is the case, simply append the HTML-code for an empty space to the description:

```
**Portal|Portal 
```

Delete the custom menu

To remove the custom menu link-icon from the wiki, the `MediaWiki:CustomMenu/Header` page must be deleted. The page can be restored via the deletion log.
