Embedding the Drawio editor

To insert a drawing in the **visual editor**:

1. **Create or choose** a page where you want to insert a drawing.
2. **Select** *Insert > Magic word* from the editor toolbar.

3. **Choose** *drawio* from the list of magic words.

4. **Click** *Done*. This opens a dialog box. Enter a name for your drawing. This name is used to version your diagram as a PNG file in the wiki.
5. **Click** *Insert*.

This inserts the tag `<drawio filename="<nameoffile>">` in your source code.

6. **Save** the page.

The drawio editor is now available on the page.

Editing the diagram

Note: To open the drawio editor, you always click on the *[Edit]* link in **page view mode**.

To edit the diagram:

1. **Click** *Edit* on the saved page next to the drawio placeholder or your already saved diagram.

2. **Add** any needed shapes to your diagram.
3. **Click** *Save* in the drawio window to save your drawing.
4. **Click** *Exit* next to the *Save* button to close the editor.

Adding links to shapes

To add a link to a shape:

1. **Right-click** to open the shape menu.
2. **Click** Edit Link.

3. **Provide** the full path of the link.

The full path must also be specified for internal wiki pages (example external link: <https://bluespice.com>, example internal link: <https://de.wiki.bluespice.com/wiki/Manual:Extension/DrawioEditor>).

Note: The displayed dropdown menu currently has no function in BlueSpice.

4. **Click** *Apply*.
5. **Repeat** steps 1-4 for other shapes in the diagram.
6. **Click** *Save*.
7. **Click** *Exit* to close the editor.

If you don't see the changes yet, click F5 on your keyboard to refresh the page.

PNG and SVG format

In BlueSpice, drawio diagrams are always saved in PNG format. It is currently not possible to save diagrams in SVG format.

Import of existing diagrams

Visio diagrams

You can import files with the extension .vsdx directly into the drawio editor and edit them further. To do this, create a diagram on a wiki page. In the drawio editor, choose *File> Import From> Device*. You can then edit the imported diagram.
