The idea

A wiki is a web-based tool that allows people to easily add, modify, or delete the content of a web page simply by using a web browser.

Wikiwiki is Hawaiian and means *quick*. It describes the idea of creating and sharing content easily and, obviously, very quickly.

In public wikis such as Wikipedia, visitors don't even need a user account to make changes to a page that other people have created or edited before. Have you ever updated a Wikipedia page yourself? You should definitely try!

Wikis use specialized wiki software and are often created in a very collaborative environment. The content is typically non-linear. In order to find relevant information, a powerful search function becomes very important. There are, however, many ways to organize a wiki so that users can navigate to content without relying only on the search function of their wiki.

Wikiwiki Shuttle in Hawaii

History

The first wiki (named *WikiWikiWeb*) was invented by Ward Cunningham in 1995.

Cunningham became impatient with existing text processing programs and was looking for a new documentation system that was adapted to fit the needs of programmers. He wanted to develop a simple software that would allow programmers to work collaboratively on source code and to publish it immediately. Also, the new program should document all editing steps automatically to track all changes that have been made. In the end, the first wiki was put online and is still working.

Wikis are for good reasons a popular technology to this day and have become very mature and feature-rich. They are a great tool for collaborating on information of any kind.

Basic functions

Editing: Every wiki page has a clearly visible editing link or button. This should encourage page visitors to immediately contribute to the content if information is missing or simply wrong. Companies should be careful when limiting the edit options on a page – they will surely miss out on important knowledge transfer opportunities.

Linking: To make it easy for users to find related information, it is very easy to insert links anywhere in the wiki, even to a page that does not yet exist!

History: With the history function, it is possible to trace every change that anyone has ever made to a page. Losing versions of important content is a thing of the past.

Recent changes: All recent changes in the entire wiki are clearly visible. Nobody wastes any time looking for the most important and most up-to-date information.

Examples for public wikis

There are large and small wiki communities that use MediaWiki to collaborate. Some examples of public wikis:

- [Wikipedia](#): Free online encyclopedia
- [FileZilla Wiki](#): Help site of the popular FTP software
- [Joomla! Documentation](#): Help documentation of the popular CMS software
- [MoodleDocs](#): Documentation of the learning platform Moodle
- [Antwiki](#): Where ant scientists share their information

Literature

- Ebersbach, Anja, Glaser, Markus und Heigl, Richard (2007): *Wiki. Kooperation im Web*, 2. Aufl., Springer: Berlin, Heidelberg.
- Lange, Christoph (Hrsg.) (2006): *Wikis und Blogs - Planen, Einrichten, Verwalten*, Computer- und Literaturverlag.
- Leuf, Bo und Cunningham, Ward (2001): *The Wiki Way. Quick Collaboration on the Web*, Addison Wesley: Boston u. a.

Metadata

This file contains additional information, probably added from the digital camera or scanner used to create or digitize it.

If the file has been modified from its original state, some details may not fully reflect the modified file.

Camera manufacturer	Canon
Camera model	Canon PowerShot SD800 IS
Exposure time	1/125 sec (0.008)
F Number	f/3.2
Date and time of data generation	18:01, 28 June 2008
Lens focal length	6.142 mm
Orientation	Normal
Horizontal resolution	180 dpi
Vertical resolution	180 dpi
Software used	Windows Photo Editor 10.0.10011.16384
File change date and time	11:09, 29 November 2019
Y and C positioning	Centered
Exif version	2.2
Date and time of digitizing	18:01, 28 June 2008
Meaning of each component	1. Y
	2. Cb
	3. Cr
	4. does not exist
Image compression mode	5
APEX shutter speed	6.96875
APEX aperture	3.34375

APEX exposure bias	0
Maximum land aperture	3.34375 APEX (f/3.19)
Metering mode	Pattern
Flash	Flash did not fire, auto mode
Supported Flashpix version	1
Color space	sRGB
Focal plane X resolution	13,653.333333333
Focal plane Y resolution	13,633.136094675
Focal plane resolution unit	inches
Sensing method	One-chip color area sensor
File source	Digital still camera
Custom image processing	Normal process
Exposure mode	Auto exposure
White balance	Auto white balance
Digital zoom ratio	1
Scene capture type	Standard
