Page lists

Page lists are dynamically created links to a group of pages based on certain selection criteria. BlueSpice has different mechanisms through which these lists can be created.

The following table contains a comparison of the most important features. All of these extensions have additional functionality besides what is listed on this page.

Comparison

Feature /Extension	SMW	SmartList	DPL3	Recent changes transclusion
Select pages based on	<ul style="list-style-type: none"> categories namespaces (include) properties, concepts compound queries are possible 	<ul style="list-style-type: none"> categories namespaces (include /exclude) 	<ul style="list-style-type: none"> categories namespaces (include /exclude) title match / naming patterns 	<ul style="list-style-type: none"> namespaces major/minor version stable/unstable version new pages /edits
Standard features	<ul style="list-style-type: none"> sorting /ordering by any criteria from the page selection 	<ul style="list-style-type: none"> sorting/ordering by title or by time of last edit 	<ul style="list-style-type: none"> sorting /ordering by any criteria from the page selection 	<ul style="list-style-type: none"> sorted by time
Output formats	<ul style="list-style-type: none"> different results formats (lists, tables, A-Z style) custom (via templates) 	<ul style="list-style-type: none"> unordered lists 	<ul style="list-style-type: none"> different results formats (lists, tables, A-Z style) custom (userformat) 	<ul style="list-style-type: none"> list view
optionally include /exclude subpages or subcategories	<ul style="list-style-type: none"> possible 	<ul style="list-style-type: none"> not possible 	<ul style="list-style-type: none"> possible 	<ul style="list-style-type: none"> not applicable
Unique features	<ul style="list-style-type: none"> shows the display title if a page has one set 	<ul style="list-style-type: none"> includes only pages that were updated in the last 90 days VisualEditor support ("Magic word") 		<ul style="list-style-type: none"> can show edit summaries namespaces can be color-highlighted
