## Description

**PastelImage** allows users to include images in an article, either via Drag&Drop, or by copying it from the clipboard.

No complicated code necessary.

## Usage / Features

- Works in the WikiCode view and in the visual editor.

- There are two ways to insert a picture:
  - Drag and Drop: drag and drop from the file explorer into a drop area.
  - Copy + Paste: Copy the image in the file browser via Ctrl + C to the clipboard and then paste it into the visual editor via Ctrl + V in the browser.

## Technical information

---

### Configuration

---

Some aspects of this extension can be configured on Special:BlueSpicePreferences, under section "Paste image". Here wiki administrators can configure:

- Default file extension if none is specified.

### Rights (permissions)

---

Users must have "edit" permission, as well as "upload", "reupload" and "reupload-shared" permissions for target namespace.

### Requirements

---

PasteImage requires [BlueSpiceFoundation](#).

PasteImage uses Java for the "Copy & Paste" functionality. So for using this feature, Java 1.7 or higher is required. Please keep your Java version up-to-date.

### User manual

---

For detailed description and usage, visit our [user manual](#).

### Property:Allows value

---

"[Allows value](#)" is a predefined property that can define a list of permissible values to restrict value assignments for a property and is provided by [Semantic MediaWiki](#). This property is pre-deployed (also known as [special property](#)) and comes with additional administrative privileges but can be used just like any other [user-defined property](#).
