Cloud	Edition:		Version:	4.1+	

Features

AboutBlueSpice offers a wiki page to provide additional information from an external source, e. g. a page from a content management system.

The extension was developed for marketing reasons, so that people come via a link to an included external page. It is delivered with every edition of a BlueSpice MediaWiki distribution.

The extension inserts a link *About BlueSpice* in the main navigation. The content of the external page is embedded via an Iframe.

This link can be deactivated in the Config manager.

Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

Requirements

MediaWiki: 1.36.0

BlueSpiceFoundation: 4.1

Integrates into

Special pages

BlueSpiceAbout

Permissions

Name	Description	Role

Accessibility

Test status:	2-testing complete	
Checked for:	Web	
Last test date:	2022-08-09	
WCAG level:	AA	
WCAG support:	partially supports (workaround: true)	
Comments:	Focus does not stay in iframe after accepting privacy policy when default BlueSpice content is loaded. (erm:25216) Default loads a page from bluespice.com which has non-compliant content (video without captions). The default page is hard to navigate because of cookie consent menu and focusable mobile menu. Link can be deactivated in main menu for all users and can be ignored by admin users in the management menu. Extension can be deactivated for on-premise installations or custom content can be loaded in iframe (customer is responsible for loading accessible content).	
Extension type:	extended
