### Features

**CountThings** provides a set of tags for counting various metadata in the wiki. This information is displayed on the page as text or in a configurable table, depending on the chosen mode.

Tags made available by this extensions are:

- countarticles: displays the total number of articles on the wiki
- countusers: displays the total number of users registered on the wiki
- countfiles: displays the total number of files uploaded to the wiki
- countcharacters - available in multiple modes:
  - Chars: number of characters on the current page (based on the wiki code, including spaces)
  - Words: number of words on the current page
  - Pages: number of pages the current article would have if printed/exported
  - All: default mode – shows all the information above in a table
