Features

InsertFile extends the *Insert media* dialog of [VisualEditor](#), providing an advanced interface for inserting files and images in the page. It offers direct file upload from the edit mode.

- Search for uploaded files and insert them.
- Filter files with a search box. Filtering files by namespace is possible, but requires the extension [NSFileRepo](#).
- Upload a new file, assign categories and insert it.
- Configure file link parameters before inserting the file link of page: Set a caption for the link and choose a link type (link to media page or direct download link).
