### What is BlueSpicePagesVisited?

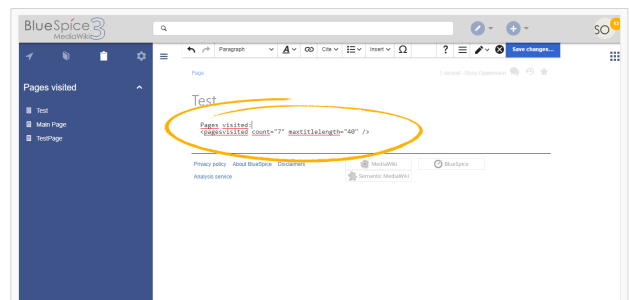

**BlueSpicePagesVisited** creates a list of a user's recently visited pages.

### Where to find the function BlueSpicePagesVisited?

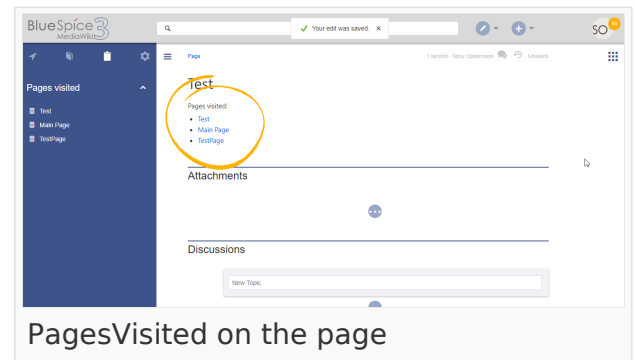

List of recently viewed pages can be found in user's personal sidebar or be embedded in a wiki page.

Pages visited in user's personal sidebar

Inserting PagesVisited tag

## User's personal sidebar

---

It can be found in the left navigation, click on the "Personal navigation" tab (clipboard icon).

To create a list with visited pages

- one has to add

```
* PAGESVISITED
```

at the user sidebar page

```
https://<YOURURL>/index.php?title=User:<USERNAME>/Sidebar
```

and

- select the assigned namespaces in the personal preferences

## Embedding the tag on a page

---

While in source edit mode, enter the following tag anywhere on the page.

```
<pagesvisited count="10" />
```

The list of recently viewed pages will appear at the place in the page where the tag was inserted.

Options that can be passed to the tag are:

- count - number of pages to show
- maxtitlelength - maximum length of each shown page
- namespaces - list of namespaces from which to show pages. Multiple namespaces can be entered, separated by comma.
- order - sorting of the pages displayed - can be "time" or "pagename"
