Type:	BlueSpice	Category:	Administration
Edition:	BlueSpice free, BlueSpice pro, BlueSpice Farm, BlueSpice Cloud	Version:	4.1+
? View user help page			

Features

BlueSpicePermissionManager offers an easy and user-friendly way to manage user permissions on the wiki.

PermissionManager is for managing rights or permissions at a group and namespace level:

- Assignment of permissions to a user group.
- Display of permissions inherited from groups in the permissions hierarchy.
- Display of permissions blocked by another group.
- Assignment of permissions on a wiki level (applies to all pages in all namespaces) and on per-namespace basis, meaning that a user group can have certain permission in one namespace but still be denied the same permission in another namespace.

Some aspects of this extension can be configured on `Special:BlueSpiceConfigManager`, under section "Permission manager". Here wiki administrators can configure:

- Backup limit: Defines, how many backups, which are created everytime the permission settings are saved, are stored.

Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

Requirements

MediaWiki: 1.36.0
BlueSpiceFoundation: 4.1

Integrates into

- BlueSpicePermissionManager

Special pages

- PermissionManager

Permissions

Name	Description	Role
permissionmanager-viewspecialpage	Access to the Special:PermissionManager special page	admin, maintenanceadmin

Configuration

Name	Value
PermissionManagerActivePreset	'custom'
PermissionManagerAllowedPresets	array (0 => 'public', 1 => 'protected', 2 => 'private', 3 => 'custom',)
PermissionManagerMaxBackups	50

API Modules

- bs-permissionmanager-tasks
