## Features

**BlueSpicePermissionManager** offers an easy and user-friendly way to manage user permissions on the wiki.

PermissionManager is for managing rights or permissions at a group and namespace level:

- Assignment of permissions to a user group.
- Display of permissions inherited from groups in the permissions hierarchy.
- Display of permissions blocked by another group.
- Assignment of permissions on a wiki level (applies to all pages in all namespaces) and on per-namespace basis, meaning that a user group can have certain permission in one namespace but still be denied the same permission in another namespace.

Some aspects of this extension can be configured on `Special:BlueSpiceConfigManager`, under section "Permission manager". Here wiki administrators can configure:

- Backup limit: Defines, how many backups, which are created everytime the permission settings are saved, are stored.

## Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice cloud can differ in some cases.

## Requirements

MediaWiki: 1.39.0  
BlueSpiceFoundation: 4.3

## Integrates into

- BlueSpicePermissionManager

## Special pages

- PermissionManager

## Permissions
