Functionality

It allows users to:

- request anonymization: The requests are directed to a site administrator for approval. If approved, the user is anonymized by the system.
- request removal: The requests are directed to a site administrator for approval. If approved, the user is deleted from the system with all their data.
- retrieve all data stored about them in the system.
- give and revoke consent to the privacy policy.

It allows site administrators to:

- manage anonymisation and deletion requests.
- get an overview of the privacy policy and cookie consent of all users.

Technical Info

Configuration

The following additional (optional) configuration settings are available. They can be cadjusted or added in *LocalSettings.php*:

Setting	Functionality
<code>\$bsgPrivacyEnableRequests = true;</code>	Allows users to request anonymization or deletion of their data.
<code>\$bsgMatomoBlueSpicePrivacyIntegration = true;</code>	Adds an opt-out button for Matomo data analysis to the privacy settings dialog. This function requires the separate lsntallation of the Matomo plugin AjaxOptOut in the /plugins folder of the installation.

Setting	Functionality
<code>\$bsgPrivacyCookieAcceptMandatory = false;</code>	Deactivates the grey lock screen that disables the user interface until the cookie settings have been accepted.

Rights (permissions)

This extension does not introduce any rights.
