## What is a QR code?

---

A QR Code (also Quick Response code) is a technology that was developed for the logistics needs of Toyota. Today, the QR code is implemented in many different products.

With the extension **BlueSpiceQrCode**, users can open a wiki page quickly on their mobile device by simply scanning the QR code on their desktop page. In addition, the QR code for a wiki page can be attached to a product or included on a printed page. Scanning the QR code on the product or the page leads directly to the wiki page.

## Usage

The QR Code added by this extension is located in the Tools menu, as menu item *QR Code*. To open the current wiki page with a mobile phone, simply scan it directly from the screen or from a printed page or packaging:

The screenshot shows a desktop view of a MediaWiki page. The page title is 'Test functions'. The main content area contains a table of topic pages. On the right side, the 'Tools' menu is open, and the 'QR code' option is highlighted with a yellow circle. The QR code option includes the text 'Scan QR code to open this page on a mobile device' and a QR code image.

Search	Navigation	Skinning and Mobile	Communication
Test the new search	Learn more about how to find your way through the wiki	Have you seen it? With BlueSpice you get the most adaptable MediaWik skin ever built	BlueSpice 3 offers new dimensions for the collaboration of experts
