}}The '''CodeEditor''' extension extends the WikiEditor  
advanced editing toolbar with an embedded Ace editor  
widget, providing some handy features for user/site JS, CSS  
pages, and — when Extension:Scribunto is also installed —  
for pages in the "Module" namespace:
```

'''BlueSpiceSocial''' is a set of extensions that add social features around a wiki page. It allows users to quickly communicate on the wiki and to express their opinion on pages.

==Scope==

BlueSpice Social contains the following functionality:

'''User profile:''' Provides the page "User:<username>".

'''Attachments:''' Connects uploaded files to wiki pages.

'''Discussions:''' Enables discussions with comments created on wiki pages. Discussion entries can be marked as "closed".

'''Activities:''' Automatically creates pages in the "SocialEntity" namespace to track page edits and creations.

'''Blog:''' Provides the special page "Special:Blog". A blog view can also be embedded into individual wiki pages.

'''Microblog:''' Similar to blog entries, but without a headline.

*syntax highlighting for JavaScript, CSS and Lua

*auto-indent

**tab key produces tab indents (since 1.22), soft indents before.

*indent/unindent selection with tab/shift-tab

*syntax validity check for JavaScript

*Pair-matching for parenthesis, braces and square brackets

'''Timeline:''' A chronological list of all social entities. The timeline filter can be used for displaying social entities on wiki pages.

<section end="training-slides" /><section end="training-maintainer" />

==User profile==

Every user has a profile that is displayed on the page "User: <username>". Users can access their user profile by clicking on "Profile" in the user menu (located in the [[Manual: Extension/BlueSpiceDiscovery|header bar]]).

The user profile shows the user's basic information (depending on the wiki setup) and the user's profile image.

Below the user info, the user's wiki activities are listed: Comments the user made, actions on pages, and in general the user's activity on the wiki. It also allows other users to leave comments on the user's profile page. [[File:Profile1a-en.png|thumb|User profile|alt=User profile|center|650x650px]]

==Discussions==

BlueSpiceSocial integrates a discussion section at the bottom of every wiki page. This section allows users to create comments directly on a wiki page. If it is the first entry in a discussion, the discussion page is automatically created at this time if this is configured in the [[Manual: Extension/BlueSpiceConfigManager|Configuration manager]].

The discussion section can be disabled on the page-level by adding the [[Manual:MagicWords|MagicWord]] "<nowiki>_NODISCUSSION_</nowiki>" to the page in source editing mode.

==Timeline==

[[File:Timeline1a-en.png|thumb|alt=Timeline|center|650x650px|Timeline]]

Timeline is a special page that provides an overview of all social conversations on the wiki.

By default, it is listed on the "Main navigation". You can also access the page directly at <code>Special:Timeline</code>.

On this page, users can sort and filter existing social entries or create new entries.

===Creating new entries===

To create a new entry, click on the "Plus" icon to add a new timeline entry:

While this extension is licensed GNU General Public License v2.0 or later (GPL-2.0+) it makes use of the Ace editor software which is licensed BSD 3-clause "New" or "Revised" License (BSD-3-Clause).

'''Blog entry''': [[#Blog|Blog]] is used for topics to be shared with other users on the wiki

'''Microblog''': Like a blog entry, but without titles. It should be used for a short entry, e.g., a quick announcement.

'''Discussion topic''': Adds a discussion entry to a particular wiki page.

===Interacting with social entities===

Every entry in the timeline is called a social entity. Depending on the type of social entity, the following interaction options exist:

'''Comments''': Number of comments related to the entity. Clicking on "Comments" opens all current comments and allows users to add a comment (if user has the necessary permissions).

'''Recommend''': Number of users that recommended the entity. Users can add a recommendation by clicking on "Recommend".

'''Linked articles''': Number of articles linked to this entity. Clicking on "Linked articles" shows the list of linked articles.

'''Watch/Unwatched''': Shows if the user is currently watching the entity (the receives notifications when the entity is changed). Clicking on Watch or Unwatch changes the state of watching.

'''Resolved/Unresolved''': The status of the entity. Some entities, like discussions on a question can have a status attached to them, so that other users know if the question is answered.

==Blog==

[[Manual:Extension/Blog|Blog]] is a special page showing an overview of all blog entities available on the wiki. By default, it is listed on the "Main navigation." You can also access the page directly at `<code>Special:Blog</code>`.

Users can sort and filter the list entries by clicking on the icons above the list.

Learn how to [[Manual:Extension/BlueSpiceSocialBlog|include the blog on any wiki page]].

==Permissions==

From BlueSpice version 3.2.7 the following roles have associated "social" permissions. Earlier versions have no option to limit the creation and editing of blog entries by using the role "commenter."

Extension: CodeEditor

→ [all extensions](#)

Overview			
Description:	Syntax-highlighted editing for JavaScript and CSS pages using Ace editor		
State:	stable	Dependency:	MediaWiki
Developer:	Brion Vibber, Derk-Jan Hartmann, and others	License:	GPL v2+ and BSD 3 Clause
Type:	MediaWiki	Category:	Editor
Edition:	BlueSpice free, BlueSpice pro, BlueSpice Farm, BlueSpice Cloud	Version:	4.1+
For more info, visit Mediawiki .			

The **CodeEditor** extension extends the WikiEditor advanced editing toolbar with an embedded Ace editor widget, providing some handy features for user/site JS, CSS pages, and — when Extension:Scribunto is also installed — for pages in the *Module* namespace:

- syntax highlighting for JavaScript, CSS and Lua
- auto-indent
- tab key produces tab indents (since 1.22), soft indents before.
- indent/unindent selection with tab/shift-tab
- syntax validity check for JavaScript
- Pair-matching for parenthesis, braces and square brackets

While this extension is licensed GNU General Public License v2.0 or later (GPL-2.0+) it makes use of the Ace editor software which is licensed BSD 3-clause "New" or "Revised" License (BSD-3-Clause).
