PHP Manager conveniently integrates PHP into your IIS installation. The steps listed here are required.

Download

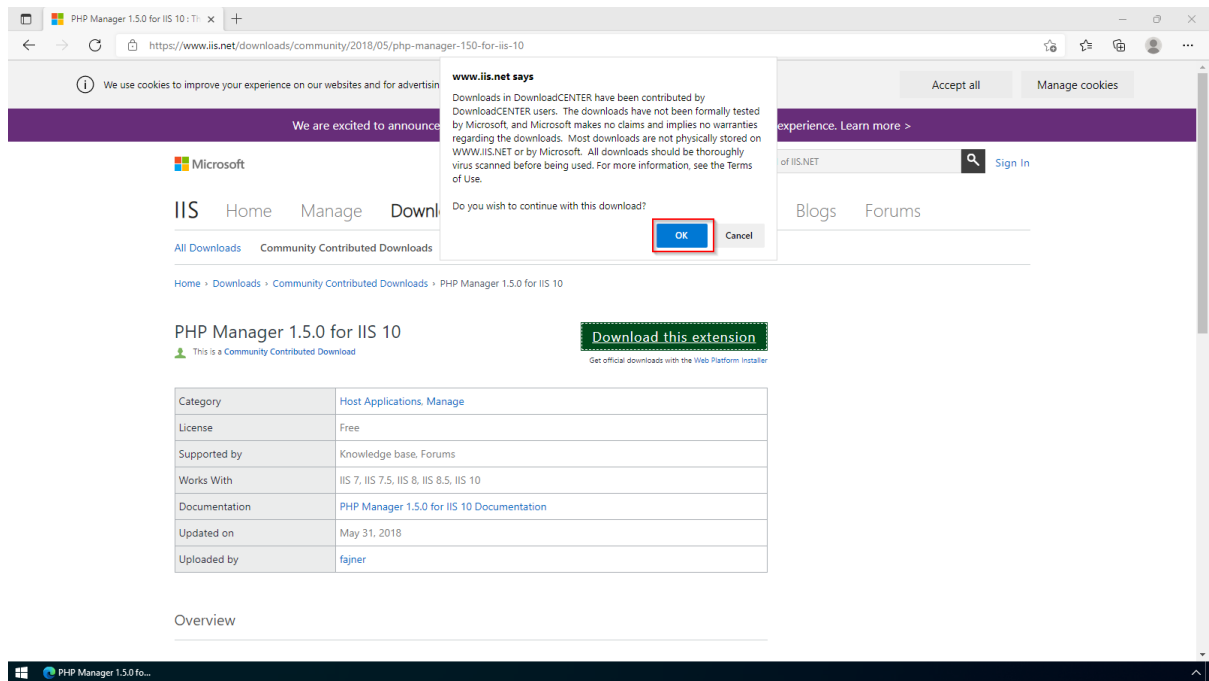

The content of this section refers to external sources and is current at the time of writing this documentation. We cannot guarantee how long these sources will remain unchanged. Please let us know if you notice any discrepancies to the information provided here.

Open the [official website at iis.net](https://www.iis.net) (1) and **click** "Download this extension" (2).

The screenshot shows the IIS.NET website. The address bar shows the URL <https://www.iis.net/downloads/community/2018/05/php-manager-150-for-iis-10>, which is highlighted with a red box and a red circle with the number 1. The page content includes a Microsoft logo, a search bar, and navigation links. The main heading is "PHP Manager 1.5.0 for IIS 10". Below this, there is a table with details about the extension. A green button labeled "Download this extension" is highlighted with a green box and a red circle with the number 2.
