Description

UEModuleDOCX exports pages and books to the docx-format. This extension requires an external license.

Usage / Features

This extension allows the output of a wiki page or book to Office Open XML. The content is inserted in a user-defined, freely selectable template. The conversion is done via an external tool, which requires a license.

- Conditions:
 - If possible, the conversion should be based on HTML template.
 - CSS / inline-styles should be supported. Here is the floating in pictures a bit critical.
 - Running headers and footers are necessary.
 - Images are embedded.
 - Attachments are not possible.
 - The template is a docx-file. The generated content from the wiki is inserted into the template at the place where the variable `$WIKICONTENT$` is located.
 - Meta information is stored in the docx-document (author, generator, etc).
- The module works with pages and books.

Technical information

Configuration

This extension offers no configurations.

Rights (permissions)

This extension does not require any special rights.

Requirements

UEModuleDOCX requires BlueSpiceFoundation and UniversalExport.

GPL v3 only

Redirect to:

- GPL v3

Reference:BlueSpiceFoundation

BlueSpiceFoundation

Makes MediaWiki enterprise ready
