Developer:	HalloWelt	**License:**	GPL-3.0-only
Type:	BlueSpice	**Category:**	Export
Edition:	BlueSpice free (deactivated), BlueSpice pro (deactivated), BlueSpice Farm (deactivated)	**Version:**	4.1+
For more info, visit **Mediawiki.**			

Features

UEModuleDOCX exports pages and books to the docx-format. This extension requires an external license.

This extension allows the output of a wiki page or book to Office Open XML. The content is inserted in a user-defined, freely selectable template. The conversion is done via an external tool, which is requires a license.

- Conditions:
  - If possible, the conversion should be based on HTML template.
  - CSS / inline-styles should be supported. Here is the floating in pictures a bit critical.
  - Running headers and footers are necessary.
  - Images are embedded.
  - Attachments are not possible.
  - The template is a docx-file. The generated content from the wiki is inserted into the template at the place where the variable `$WIKICONTENT$` is located.
  - Meta information is stored in the docx-document (author, generator, etc).

Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

Requirements

MediaWiki: 1.36.0
BlueSpiceFoundation: 4.1

- BlueSpiceUniversalExport: 4.1

Integrates into

- BlueSpiceUniversalExport
