Usage / features

The export is executed taking into account the export settings (parameters, tags). It checks permissions and collects the parameters and metadata of the entities to be exported, providing the context for the export module.

It supports the following export modules:

- [UEModuleBookPDF](#)
- [UEModuleHTML](#)
- [UEModulePDF](#)
- [UEModulePDFRecursive](#)
- [UEModulePDFSubpages](#)
- [UEModuleTable2Excel](#)

Technical information

Configuration

Some aspects of this extension can be configured in the ConfigManager, extension *BlueSpiceUniversalExport*. Here, wiki administrators can configure:

- Default metadata (JSON format)
- Override metadata (JSON format)

Rights (permissions)

This extension does not provide any permissions. The permissions are handled by the individual modules instead.

Requirements

UniversalExport requires [BlueSpiceFoundation](#).

More info

For detailed description and usage, visit our [help page](#).

Demo

You can export a wiki page in our [BlueSpiceDemo](#).
