PDF output of wiki pages

PDF output of wiki pages is currently not sufficiently tagged and therefore cannot produce accessible PDFs.

It is, however, possible for users to upload and link accessible PDFs in the wiki.

Support documents

BlueSpice is documented in BlueSpice-based wikis. Therefore, the same criteria for Web /Authoring tools also apply for Support Docs. When content in and for these wikis is created (such as videos and wiki pages), these pages are frequently reviewed for accessibility (such as heading levels, alt-text, table syntax and captioning/transcripts for videos). In addition, the helpdesk footer contains an accessibilty link to an accessibility disclaimer that allows users to provide feedback.

Bundled extensions

All extensions and functionality developed by HalloWelt! is regularly tested for accessibility issues starting with BlueSpice 4.1. Other bundled extensions not developed by HalloWelt! can have issues that need to be resolved by the according developers. We take as much time as possible to also review these extensions and provide accessibility information for them. See attached list of extensions.
