<b>Edition:</b>	BlueSpice pro, BlueSpice free, BlueSpice Farm, BlueSpice Cloud	<b>Version:</b>	4.1+
<a href="#">? View user help page</a>			

## Features

**UserSideBar** lets users create their own personal sidebar navigation.

- The content under Focus in the Users' Home Bar can be customized by the user.
- Extensions can provide a tag over which content is displayed, currently the following pages are shown by default:
  - PAGESVISITED
  - YOUREDITS (own edits)
  - WATCHLIST
- Users can also create their own areas:
  - Entries with an asterisk (\*) are always interpreted as area headings (analog mediawiki: sidebar).
  - Entries with two stars (\*\*) are content elements of the area. Single (\*\*) without assignment to (\*) are discarded.
  - The pages are determined as in the Mediawiki: Sidebar by URL

## Technical Information

This information applies to BlueSpice 4. Technical details for BlueSpice Cloud can differ in some cases.

## Requirements

MediaWiki: 1.36.0  
BlueSpiceFoundation: 4.1

## Integrates into
