Features

FlaggedRevs is a MediaWiki extension that activates an approval mechanism.

New versions of an article are initially marked as drafts and remain so until a user with revision rights checks and approves the page.

The MediaWiki extension is customized in BlueSpice. It uses the [FlaggedRevsConnector](#) to work alongside [workflows](#), realising the complete functionality of an editorial process with a final approval step.

Warning! The setting `FR_INCLUDES_FREEZE` for handling the state of included files of an approved wiki page has [no long term support by](#) and should not be introduced in a new wiki for that reason.
