RSS

A [quality version](#) of this page, [accepted](#) on *14 July 2020*, was based off this revision.

The **RSS feed** extension *renders* ("displays") one or more RSS feeds on a wiki page in a standard or user-definable format. Since version 2.00, the extension is compatible with [Extension:WikiArticleFeeds](#) which *generates* RSS or ATOM feeds from MediaWiki pages (authoring tool).

Use one section between `<rss>`-tags for each feed. The rss element may contain parameters if you provide them as attributes to the rss element.

For more information visit [MediaWiki](#).

Really Simple Syndication. An RSS feed consists of an XML file that contains the pure structured content - for example a news page - but no layout. Allows you to subscribe to content or changes to a website in a summarized form as a feed. Examples are news tickers or the list of changes in a wiki.
