Semantic MediaWiki

allows users to add structured data to wiki pages through simple wikitext markup that turns links to other pages and data values in a page into meaningful properties. With this information, SMW helps to search, organize, browse, evaluate, and share the wiki's content.

Status:	stable
Developer:	Markus Krötzsch, Jeroen De Dauw, James Hong Kong
Extension type:	MediaWiki
Edition:	BlueSpice pro
Dependencies:	MediaWiki
License:	GPL v2+
Activated:	Yes
Category:	Data Analysis

Semantic MediaWiki (SMW) is an extension for managing structured data in your wiki and for querying that data to create dynamic representations: tables, timelines, maps, lists, etc. The actual homepage of Semantic MediaWiki, including user documentation in multiple languages, is semantic-mediawiki.org. There are various other pages in the MediaWiki and Wikipedia space related to SMW, but the homepage is the most up-to-date source of information.

There are a large number of "spinoff" extensions that require the presence of Semantic MediaWiki; see the category [Semantic MediaWiki extensions](#) for the full list (some of these extensions are obsolete).

Makes the wiki more accessible - for machines and humans.

For more information please visit MediaWiki.
