Reference:SpamBlacklist

Extension: SpamBlacklist

all extensions

Overview			
Description:	Create and manage blacklists based on URL patterns to avoid spam in the wiki.		
State:	stable	**Dependency:**	MediaWiki
Developer:	Tim Starling	**License:**	GPL v2+
Type:	MediaWiki	**Category:**	Security
Edition:	BlueSpice free (deactivated), BlueSpice pro (deactivated), BlueSpice Farm (deactivated)	**Version:**	4.1+
For more info, visit **Mediawiki**.			

Features

SpamBlacklist prevents edits that contain URLs whose domains match regular expression patterns defined in specified files or wiki pages. When someone tries to save a page, SpamBlacklist checks the text against a (potentially very large) list of illegal host names. If there is a match, the extension displays an error message to the user and refuses to save the page.

Accessibility

Test status:	2-testing complete
Checked for:	Authoring tool
Last test date:	2022-08-05
WCAG level:	AA
WCAG support:	supports
Comments:	allows to create text-based blocking lists in the MediaWiki namespace.

Extension type:	core
Extension focus:	admin
