Reference:TitleKey

Extension: TitleKey

→ [all extensions](#)

Overview			
Description:	Provides a title prefix search suggestion backend.		
State:	stable	Dependency:	MediaWiki
Developer:	Brion Vibber	License:	GPL v2+
Type:	MediaWiki	Category:	Infrastructure
Edition:	BlueSpice pro, BlueSpice free, BlueSpice Farm, BlueSpice Cloud	Version:	4.1+
For more info, visit MediaWiki .			

Features

The extension **TitleKey** provides a case-insensitive title prefix search. It uses a separate table for the keys, so if it works cleanly it can be deployed without an expensive rebuild of core tables, and dumped when Wikimedia gets a nicer backend through [MWSearch](#) extension.

This extension provides no benefit if you are using [CirrusSearch](#).^[1]

For the average site administrator, the benefit of this extension is that it allows search suggestions (e.g. from [Opensearch API](#)) to be case-**ins**ensitive.

For more information please visit [MediaWiki](#).
