Description

UEModuleBookPDF export books to PDF format.

Usage / Features

- Creates a PDF book based on the data from the Universal Export.
- Underlying is an HTML / PHP template, which is also customizable by the user.
- Metadata is embedded in the PDF.
- Numbering of chapters and the table of contents is generated.
- Files are attached.
- The pages of the PDF Book are printed on the model of the PDF single pages.
- When exporting a title page and a table of contents should be generated.
 - The cover sheet contains company logo and date of creation and is freely designable.
 - The table of contents is generated automatically, is clickable and allows the direct jump to the desired position within the document.
- In addition, a summary of the changes under the term "last changes" will appear. It contains the relevant changes (ie not minor changes in the system) of the articles within the last two years. If required, the date (format: dd.mm.yyyy, sort order descending), article name and change note of the released statuses should appear.
- References to uploaded documents are included in the PDF book as an attachment ("merge" in the sense of readable articles and non-attachment). Footnotes from wiki articles should be placed at the end of the PDF page and should not appear at the end of the article.
- Breakthroughs of text, tables and images are intelligent to implement (not a single line of a new paragraph as the last line of a page, on the following page continuous tables get the table header again, images are only on one page to represent).
- As the chapter numbering is shown in the header, a page break is required when changing to another chapter.
- Hyperlinks are clickable and refer to the desired position within the document (also applies to attachments), external links are included in the pdf as a hyperlink.

Book Editor: Staff Handbook

[Book Manager](#) | [Show source article](#) | [Edit source article](#)

The screenshot displays the 'Book Editor' interface for a 'Staff Handbook'. At the top, there are navigation links: 'Book Manager', 'Show source article', and 'Edit source article'. Below these are three icons: a green plus sign, a red minus sign, and a grey wrench. To the right, there is an 'Export selection' dropdown menu, which is highlighted with a blue box. The dropdown menu shows a PDF icon and the text 'Portable Document Format (PDF)'. To the right of this dropdown is an 'Export table' button. The main content area is a list of 19 items, each with a checkbox and a label. The items are: 1. Your induction, 2. Starting with Our Company, 3. Relocation Policy, 4. Probation Periods, 5. Your Attendance at Work (expanded), 5.1. Notification of Absence, 5.2. Sickness Payments, 6. Hours of Work, 7. Flexible Working, 8. Criminal Records Checks, 9. Conflict of Interest, 10. Standards of Performance and Behaviour at Work, 11. Data Protection and Access to Information, 12. Changes in Personal Information for Employment Purposes, 13. Trade Union Membership, 14. Valuing Diversity and Dignity at Work, 15. Pay, Benefits & Pensions, 16. Leave Arrangements, 17. Health and Safety, 18. Training and Development, and 19. Leaving Our Company. At the bottom right of the list, there are 'Save' and 'Cancel' buttons.

Technical information

Configuration

Some aspects of this extension can be configured on Special:BlueSpiceConfigManager, under section "Universal export PDF module". Here wiki administrators can configure:

- How Table of content should be shown.
- Default template.
- Template directory (physical path to the directory holding the templates).

Rights (permissions)

This extension does not require any special rights.

Requirements

UEModuleBookPDF requires BlueSpiceFoundation and UniversalExport.

User manual

UEModuleBookPDF is a module that allows export to PDF format. Read more on UniversalExport.
