Type:	MediaWiki	**Category:**	Administration
Edition:	BlueSpice pro, BlueSpice free, BlueSpice Farm, BlueSpice Cloud	**Version:**	4.1+
For more info, visit **Mediawiki.**			

Features

UserMerge extension allows wiki users with the *usermerge* permission (Bureaucrat by default) to merge one Wiki user's account with another Wiki user's account.

The extension allows to:

- merge (refer contributions, texts, watchlists, edit count of a first account A to a second account B
- delete the first account A after the merge (option box)

Limitations

- you cannot delete a user A without having merged the user A to B
- you cannot merge your own account (logged-in user) into a different user

Extras

- if you omit the "New User" field, then the extension auto-populates the New User as "Anonymous" (user_id 0), and ask you to confirm a merge to Anonymous. This is used for user deletion: you first empty (merge to user 0) contributions of a user A, and then delete the user A.
- If your version of the extension complains about an empty "New User" field you can fill in "Anonymous".

Accessibility

Test status:	2-testing complete

Checked for:	Authoring tool
Last test date:	2022-08-08
WCAG level:	AA
WCAG support:	supports
Comments:	Form for merging users is accessible to screenreader.
